Narratives of deaths, other serious adverse events and withdrawals due to adverse events

Subject KLV-7702-1001

Subject KLV-7702-1001 was a 66-year-old woman enrolled at site 0105 and assigned to 100 mg. Written informed consent was obtained on 2018-02-07 and the first dose of study treatment was administered on 2018-02-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 75, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 75.

The subject died on 2018-05-29. The event recorded as the cause of death was ascites, which began on study day 75 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1008

Subject KLV-7702-1008 was a 65-year-old man enrolled at site 0105 and assigned to 200 mg. Written informed consent was obtained on 2018-11-29 and the first dose of study treatment was administered on 2018-12-14. The baseline performance status was 1 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2019-02-25 and the reason recorded was adverse event.

Subject KLV-7702-1010

Subject KLV-7702-1010 was a 50-year-old man enrolled at site 0106 and assigned to 200 mg. Written informed consent was obtained on 2018-11-11 and the first dose of study treatment was administered on 2018-11-23. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, not recovered/not resolved); blood creatinine increased (grade 3, onset study day 86, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-03-29 and the reason recorded was withdrawal by subject.

Subject KLV-7702-1013

Subject KLV-7702-1013 was a 67-year-old woman enrolled at site 0106 and assigned to 200 mg. Written informed consent was obtained on 2018-01-14 and the first dose of study treatment was administered on 2018-02-04. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: blood creatinine increased (grade 4, onset study day 7, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 27.

The subject was alive at the last recorded contact. Treatment ended on 2018-12-08 and the reason recorded was adverse event.

Subject KLV-7702-1014

Subject KLV-7702-1014 was a 59-year-old man enrolled at site 0106 and assigned to 200 mg. Written informed consent was obtained on 2017-05-08 and the first dose of study treatment was administered on 2017-06-02. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2018-06-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7702-1017

Subject KLV-7702-1017 was a 71-year-old man enrolled at site 0109 and assigned to 300 mg. Written informed consent was obtained on 2018-03-17 and the first dose of study treatment was administered on 2018-03-31. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, not recovered/not resolved); pneumonia (grade 4, onset study day 87, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-08-07 and the reason recorded was lost to follow-up.

Subject KLV-7702-1019

Subject KLV-7702-1019 was a 65-year-old woman enrolled at site 0108 and assigned to 300 mg. Written informed consent was obtained on 2018-08-28 and the first dose of study treatment was administered on 2018-09-04. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-01-12 and the reason recorded was withdrawal by subject.

Subject KLV-7702-1022

Subject KLV-7702-1022 was a 58-year-old woman enrolled at site 0106 and assigned to 300 mg. Written informed consent was obtained on 2016-12-11 and the first dose of study treatment was administered on 2016-12-30. The baseline performance status was 0 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following sepsis, first reported on study day 50.

The subject was alive at the last recorded contact. Treatment ended on 2017-06-11 and the reason recorded was adverse event.

Subject KLV-7702-1026

Subject KLV-7702-1026 was a 50-year-old man enrolled at site 0101 and assigned to 300 mg. Written informed consent was obtained on 2017-10-18 and the first dose of study treatment was administered on 2017-11-07. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 82, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 82.

The subject died on 2018-02-06. The event recorded as the cause of death was intestinal obstruction, which began on study day 82 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1027

Subject KLV-7702-1027 was a 68-year-old man enrolled at site 0109 and assigned to 300 mg. Written informed consent was obtained on 2017-08-05 and the first dose of study treatment was administered on 2017-08-23. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 49, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2017-12-13 and the reason recorded was completion of treatment per protocol.

Subject KLV-7702-1029

Subject KLV-7702-1029 was a 51-year-old man enrolled at site 0105 and assigned to 300 mg. Written informed consent was obtained on 2018-09-28 and the first dose of study treatment was administered on 2018-10-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 70, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-02-19 and the reason recorded was withdrawal by subject.

Subject KLV-7702-1030

Subject KLV-7702-1030 was a 84-year-old man enrolled at site 0107 and assigned to 300 mg. Written informed consent was obtained on 2017-04-27 and the first dose of study treatment was administered on 2017-05-23. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 50, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 50.

The subject died on 2017-07-21. The event recorded as the cause of death was sepsis, which began on study day 50 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1035

Subject KLV-7702-1035 was a 62-year-old woman enrolled at site 0106 and assigned to 300 mg. Written informed consent was obtained on 2018-01-20 and the first dose of study treatment was administered on 2018-02-11. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 104, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 104.

The subject died on 2018-05-28. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 104 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1036

Subject KLV-7702-1036 was a 72-year-old man enrolled at site 0102 and assigned to 300 mg. Written informed consent was obtained on 2017-01-18 and the first dose of study treatment was administered on 2017-01-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: nausea (grade 3, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2017-09-24. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7702-1042

Subject KLV-7702-1042 was a 80-year-old man enrolled at site 0105 and assigned to 300 mg. Written informed consent was obtained on 2017-05-10 and the first dose of study treatment was administered on 2017-05-22. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: cough (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2017-06-16 and the reason recorded was lost to follow-up.

Subject KLV-7702-1043

Subject KLV-7702-1043 was a 59-year-old woman enrolled at site 0103 and assigned to 300 mg. Written informed consent was obtained on 2018-03-06 and the first dose of study treatment was administered on 2018-03-16. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 67, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 67.

The subject died on 2018-06-04. The event recorded as the cause of death was pneumonia, which began on study day 67 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1045

Subject KLV-7702-1045 was a 53-year-old man enrolled at site 0101 and assigned to 300 mg. Written informed consent was obtained on 2017-08-16 and the first dose of study treatment was administered on 2017-09-05. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: aspartate aminotransferase increased (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-03-29 and the reason recorded was disease progression.

Subject KLV-7702-1046

Subject KLV-7702-1046 was a 73-year-old man enrolled at site 0105 and assigned to 300 mg. Written informed consent was obtained on 2017-08-25 and the first dose of study treatment was administered on 2017-09-06. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 88, recovered/resolved); myelodysplastic syndrome (grade 3, onset study day 112, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-04-10 and the reason recorded was completion of treatment per protocol.

Subject KLV-7702-1047

Subject KLV-7702-1047 was a 73-year-old man enrolled at site 0102 and assigned to 400 mg. Written informed consent was obtained on 2016-10-31 and the first dose of study treatment was administered on 2016-11-26. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2017-03-19 and the reason recorded was disease progression.

Subject KLV-7702-1048

Subject KLV-7702-1048 was a 68-year-old man enrolled at site 0107 and assigned to 400 mg. Written informed consent was obtained on 2018-02-18 and the first dose of study treatment was administered on 2018-03-13. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: lymphopenia (grade 4, onset study day 14, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following lymphopenia, first reported on study day 14.

The subject was alive at the last recorded contact. Treatment ended on 2018-09-23 and the reason recorded was adverse event.

Subject KLV-7702-1050

Subject KLV-7702-1050 was a 63-year-old woman enrolled at site 0107 and assigned to 400 mg. Written informed consent was obtained on 2018-02-04 and the first dose of study treatment was administered on 2018-02-21. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 59, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 59.

The subject died on 2018-05-09. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 59 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7702-1051

Subject KLV-7702-1051 was a 71-year-old man enrolled at site 0103 and assigned to 400 mg. Written informed consent was obtained on 2017-11-01 and the first dose of study treatment was administered on 2017-11-17. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 89, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-09-24 and the reason recorded was completion of treatment per protocol.

Subject KLV-7702-1052

Subject KLV-7702-1052 was a 80-year-old woman enrolled at site 0109 and assigned to 400 mg. Written informed consent was obtained on 2017-06-16 and the first dose of study treatment was administered on 2017-06-25. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 89, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-09-15 and the reason recorded was completion of treatment per protocol.

Subject KLV-7702-1053

Subject KLV-7702-1053 was a 47-year-old man enrolled at site 0107 and assigned to 400 mg. Written informed consent was obtained on 2017-06-02 and the first dose of study treatment was administered on 2017-06-26. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2017-12-07 and the reason recorded was completion of treatment per protocol.

Subject KLV-7702-1058

Subject KLV-7702-1058 was a 57-year-old man enrolled at site 0106 and assigned to 400 mg. Written informed consent was obtained on 2018-06-13 and the first dose of study treatment was administered on 2018-07-04. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 40, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-02-10 and the reason recorded was physician decision.
