Narratives of deaths, other serious adverse events and withdrawals due to adverse events

Subject KLV-7704-1006

Subject KLV-7704-1006 was a 60-year-old woman enrolled at site 0110 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-05-20 and the first dose of study treatment was administered on 2019-06-12. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 116, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 116.

The subject died on 2019-10-17. The event recorded as the cause of death was ascites, which began on study day 116 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1012

Subject KLV-7704-1012 was a 55-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-17 and the first dose of study treatment was administered on 2019-09-02. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 138, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 138.

The subject died on 2020-01-28. The event recorded as the cause of death was pneumonia, which began on study day 138 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1013

Subject KLV-7704-1013 was a 54-year-old woman enrolled at site 0109 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-09-29 and the first dose of study treatment was administered on 2018-10-25. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 67, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-06-27 and the reason recorded was disease progression.

Subject KLV-7704-1014

Subject KLV-7704-1014 was a 63-year-old woman enrolled at site 0107 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-09-14 and the first dose of study treatment was administered on 2018-10-03. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2019-10-25. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1033

Subject KLV-7704-1033 was a 67-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-06-11 and the first dose of study treatment was administered on 2018-06-27. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2020-04-17. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1035

Subject KLV-7704-1035 was a 51-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-07-31 and the first dose of study treatment was administered on 2018-08-12. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: lymphopenia (grade 3, onset study day 141, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-11-06 and the reason recorded was completion of treatment per protocol.

Subject KLV-7704-1036

Subject KLV-7704-1036 was a 46-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-11-07 and the first dose of study treatment was administered on 2018-11-17. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2019-11-11. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1042

Subject KLV-7704-1042 was a 62-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-20 and the first dose of study treatment was administered on 2019-09-29. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 115, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 115.

The subject died on 2020-02-06. The event recorded as the cause of death was sepsis, which began on study day 115 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1044

Subject KLV-7704-1044 was a 61-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-02 and the first dose of study treatment was administered on 2019-11-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 135, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-03-21 and the reason recorded was physician decision.

Subject KLV-7704-1049

Subject KLV-7704-1049 was a 66-year-old woman enrolled at site 0102 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-10-20 and the first dose of study treatment was administered on 2018-11-06. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 78, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 78.

The subject died on 2019-02-11. The event recorded as the cause of death was intestinal obstruction, which began on study day 78 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1053

Subject KLV-7704-1053 was a 68-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-03 and the first dose of study treatment was administered on 2019-11-21. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 19, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 19.

The subject died on 2019-12-24. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 19 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1054

Subject KLV-7704-1054 was a 58-year-old woman enrolled at site 0112 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-27 and the first dose of study treatment was administered on 2019-12-11. The baseline performance status was 0 and 4 prior lines of therapy had been received.

Study treatment was withdrawn following nausea, first reported on study day 21.

The subject was alive at the last recorded contact. Treatment ended on 2020-03-13 and the reason recorded was adverse event.

Subject KLV-7704-1056

Subject KLV-7704-1056 was a 69-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-03-13 and the first dose of study treatment was administered on 2019-03-30. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The subject died on 2020-02-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1058

Subject KLV-7704-1058 was a 58-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-05-29 and the first dose of study treatment was administered on 2019-06-09. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 53, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-09-28 and the reason recorded was physician decision.

Subject KLV-7704-1059

Subject KLV-7704-1059 was a 62-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-07-22 and the first dose of study treatment was administered on 2018-08-06. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 33, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2018-12-16 and the reason recorded was physician decision.

Subject KLV-7704-1062

Subject KLV-7704-1062 was a 71-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-08-15 and the first dose of study treatment was administered on 2018-09-12. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2019-10-04. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1063

Subject KLV-7704-1063 was a 62-year-old woman enrolled at site 0102 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-03-02 and the first dose of study treatment was administered on 2019-03-21. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 23, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-09-05 and the reason recorded was physician decision.

Subject KLV-7704-1068

Subject KLV-7704-1068 was a 51-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-03-25 and the first dose of study treatment was administered on 2019-04-19. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: vomiting (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-10-01 and the reason recorded was lost to follow-up.

Subject KLV-7704-1070

Subject KLV-7704-1070 was a 63-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-03-17 and the first dose of study treatment was administered on 2019-04-09. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2020-04-14. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7704-1071

Subject KLV-7704-1071 was a 58-year-old woman enrolled at site 0107 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-05-02 and the first dose of study treatment was administered on 2019-05-21. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 103, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 103.

The subject died on 2019-09-01. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 103 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7704-1075

Subject KLV-7704-1075 was a 73-year-old woman enrolled at site 0103 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-05-16 and the first dose of study treatment was administered on 2019-06-08. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: aspartate aminotransferase increased (grade 4, onset study day 44, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following aspartate aminotransferase increased, first reported on study day 44.

The subject was alive at the last recorded contact. Treatment ended on 2020-03-04 and the reason recorded was adverse event.

Subject KLV-7704-1076

Subject KLV-7704-1076 was a 73-year-old woman enrolled at site 0104 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-01-29 and the first dose of study treatment was administered on 2019-02-08. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-06-19 and the reason recorded was lost to follow-up.

Subject KLV-7704-1079

Subject KLV-7704-1079 was a 64-year-old woman enrolled at site 0110 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2018-09-30 and the first dose of study treatment was administered on 2018-10-24. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: diarrhoea (grade 4, onset study day 11, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-02-19 and the reason recorded was lost to follow-up.

Subject KLV-7704-1080

Subject KLV-7704-1080 was a 88-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-16 and the first dose of study treatment was administered on 2020-01-31. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-04-07 and the reason recorded was disease progression.
