Narratives of deaths, other serious adverse events and withdrawals due to adverse events

Subject KLV-7701-1001

Subject KLV-7701-1001 was a 57-year-old woman enrolled at site 0152 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-06 and the first dose of study treatment was administered on 2019-09-14. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-09-23. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1002

Subject KLV-7701-1002 was a 70-year-old woman enrolled at site 0112 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-11 and the first dose of study treatment was administered on 2020-10-18. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 111, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 111.

The subject died on 2021-02-23. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 111 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1005

Subject KLV-7701-1005 was a 64-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-18 and the first dose of study treatment was administered on 2019-09-28. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 9, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-10-05 and the reason recorded was physician decision.

Subject KLV-7701-1006

Subject KLV-7701-1006 was a 58-year-old woman enrolled at site 0135 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-16 and the first dose of study treatment was administered on 2020-07-07. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The subject died on 2022-02-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1010

Subject KLV-7701-1010 was a 54-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-18 and the first dose of study treatment was administered on 2021-06-13. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 96, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-29 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1012

Subject KLV-7701-1012 was a 64-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-29 and the first dose of study treatment was administered on 2020-11-11. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2022-05-04. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1015

Subject KLV-7701-1015 was a 81-year-old woman enrolled at site 0129 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-12-23 and the first dose of study treatment was administered on 2020-01-09. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 82, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 82.

The subject died on 2020-04-13. The event recorded as the cause of death was neutropenia, which began on study day 82 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1016

Subject KLV-7701-1016 was a 72-year-old woman enrolled at site 0124 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-03 and the first dose of study treatment was administered on 2020-03-27. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-11-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1024

Subject KLV-7701-1024 was a 61-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-02-06 and the first dose of study treatment was administered on 2021-03-04. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 40, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-08-26 and the reason recorded was physician decision.

Subject KLV-7701-1026

Subject KLV-7701-1026 was a 67-year-old woman enrolled at site 0143 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-03 and the first dose of study treatment was administered on 2020-04-17. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The subject died on 2021-04-08. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1028

Subject KLV-7701-1028 was a 63-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-12 and the first dose of study treatment was administered on 2020-12-05. The baseline performance status was 0 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following lymphopenia, first reported on study day 56.

The subject was alive at the last recorded contact. Treatment ended on 2021-05-08 and the reason recorded was adverse event.

Subject KLV-7701-1029

Subject KLV-7701-1029 was a 59-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-04 and the first dose of study treatment was administered on 2020-10-29. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 43, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 43.

The subject died on 2020-12-24. The event recorded as the cause of death was pneumonia, which began on study day 43 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1032

Subject KLV-7701-1032 was a 68-year-old woman enrolled at site 0176 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-19 and the first dose of study treatment was administered on 2020-10-13. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 54, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-24 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1034

Subject KLV-7701-1034 was a 62-year-old woman enrolled at site 0184 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-27 and the first dose of study treatment was administered on 2020-08-19. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 99, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-12-10 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1036

Subject KLV-7701-1036 was a 88-year-old woman enrolled at site 0171 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-04 and the first dose of study treatment was administered on 2020-06-27. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-03-19. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1038

Subject KLV-7701-1038 was a 38-year-old woman enrolled at site 0102 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-28 and the first dose of study treatment was administered on 2019-12-18. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2021-04-21. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1039

Subject KLV-7701-1039 was a 74-year-old woman enrolled at site 0177 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-22 and the first dose of study treatment was administered on 2019-11-02. The baseline performance status was 2 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-07 and the reason recorded was disease progression.

Subject KLV-7701-1047

Subject KLV-7701-1047 was a 68-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-11 and the first dose of study treatment was administered on 2020-09-18. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-02-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1051

Subject KLV-7701-1051 was a 69-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-28 and the first dose of study treatment was administered on 2020-12-06. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-03-01. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1055

Subject KLV-7701-1055 was a 64-year-old woman enrolled at site 0160 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-02-28 and the first dose of study treatment was administered on 2020-03-21. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 4, onset study day 25, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-21 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1056

Subject KLV-7701-1056 was a 75-year-old woman enrolled at site 0135 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-28 and the first dose of study treatment was administered on 2021-10-24. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: hypertension (grade 4, onset study day 18, recovered/resolved); pneumonia (grade 4, onset study day 23, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-04-03 and the reason recorded was lost to follow-up.

Subject KLV-7701-1061

Subject KLV-7701-1061 was a 79-year-old woman enrolled at site 0191 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-12-11 and the first dose of study treatment was administered on 2019-12-28. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The subject died on 2022-01-12. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1062

Subject KLV-7701-1062 was a 62-year-old woman enrolled at site 0155 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-14 and the first dose of study treatment was administered on 2019-10-08. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: dyspnoea (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following dyspnoea, first reported on study day 2.

The subject died on 2019-10-17. The event recorded as the cause of death was dyspnoea, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1065

Subject KLV-7701-1065 was a 50-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-01-24 and the first dose of study treatment was administered on 2021-02-21. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 41, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-10 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1069

Subject KLV-7701-1069 was a 79-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-01 and the first dose of study treatment was administered on 2021-06-11. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 89, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 89.

The subject died on 2021-09-08. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 89 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1070

Subject KLV-7701-1070 was a 61-year-old woman enrolled at site 0117 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-14 and the first dose of study treatment was administered on 2020-12-12. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 48, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 48.

The subject died on 2021-02-13. The event recorded as the cause of death was anaemia, which began on study day 48 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1072

Subject KLV-7701-1072 was a 78-year-old woman enrolled at site 0191 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-16 and the first dose of study treatment was administered on 2020-11-29. The baseline performance status was 1 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following fatigue, first reported on study day 34.

The subject was alive at the last recorded contact. Treatment ended on 2021-05-25 and the reason recorded was adverse event.

Subject KLV-7701-1076

Subject KLV-7701-1076 was a 55-year-old woman enrolled at site 0187 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-22 and the first dose of study treatment was administered on 2021-07-20. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: nausea (grade 3, onset study day 54, recovered/resolved); anaemia (grade 3, onset study day 79, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-06 and the reason recorded was disease progression.

Subject KLV-7701-1078

Subject KLV-7701-1078 was a 71-year-old woman enrolled at site 0114 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-06 and the first dose of study treatment was administered on 2021-03-24. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 6, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-04-10 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1081

Subject KLV-7701-1081 was a 62-year-old woman enrolled at site 0181 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-01-09 and the first dose of study treatment was administered on 2022-01-27. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 69, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-05-11 and the reason recorded was physician decision.

Subject KLV-7701-1082

Subject KLV-7701-1082 was a 63-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-10 and the first dose of study treatment was administered on 2020-12-30. The baseline performance status was 1 and 4 prior lines of therapy had been received.

Study treatment was withdrawn following nausea, first reported on study day 33.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-09 and the reason recorded was adverse event.

Subject KLV-7701-1086

Subject KLV-7701-1086 was a 49-year-old woman enrolled at site 0121 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-28 and the first dose of study treatment was administered on 2021-01-05. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 63, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 63.

The subject died on 2021-03-12. The event recorded as the cause of death was sepsis, which began on study day 63 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1087

Subject KLV-7701-1087 was a 66-year-old woman enrolled at site 0142 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-01-26 and the first dose of study treatment was administered on 2021-02-18. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 40, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-14 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1097

Subject KLV-7701-1097 was a 81-year-old woman enrolled at site 0170 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-14 and the first dose of study treatment was administered on 2020-01-24. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-07-19. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1098

Subject KLV-7701-1098 was a 59-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-11 and the first dose of study treatment was administered on 2021-05-31. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 8, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-05 and the reason recorded was physician decision.

Subject KLV-7701-1099

Subject KLV-7701-1099 was a 71-year-old woman enrolled at site 0146 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-02-24 and the first dose of study treatment was administered on 2021-03-11. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 39, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following asthenia, first reported on study day 29.

The subject died on 2021-05-05. The event recorded as the cause of death was neutropenia, which began on study day 39 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1101

Subject KLV-7701-1101 was a 79-year-old woman enrolled at site 0115 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-01 and the first dose of study treatment was administered on 2020-10-11. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-02-25. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1105

Subject KLV-7701-1105 was a 60-year-old woman enrolled at site 0190 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-16 and the first dose of study treatment was administered on 2020-07-09. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 10, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 10.

The subject died on 2020-07-19. The event recorded as the cause of death was ascites, which began on study day 10 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1106

Subject KLV-7701-1106 was a 66-year-old woman enrolled at site 0170 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-17 and the first dose of study treatment was administered on 2021-03-30. The baseline performance status was 1 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following leukopenia, first reported on study day 2.

The subject died on 2022-04-11. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1108

Subject KLV-7701-1108 was a 47-year-old woman enrolled at site 0188 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-06 and the first dose of study treatment was administered on 2020-12-19. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 59, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 59.

The subject died on 2021-03-03. The event recorded as the cause of death was thrombocytopenia, which began on study day 59 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1110

Subject KLV-7701-1110 was a 73-year-old woman enrolled at site 0141 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-04 and the first dose of study treatment was administered on 2021-10-31. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 8, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 8.

The subject died on 2021-11-13. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 8 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1111

Subject KLV-7701-1111 was a 81-year-old woman enrolled at site 0122 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-03 and the first dose of study treatment was administered on 2020-07-31. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2021-11-15. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1115

Subject KLV-7701-1115 was a 67-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-24 and the first dose of study treatment was administered on 2020-09-18. The baseline performance status was 0 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following fatigue, first reported on study day 2.

The subject died on 2021-10-07. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1118

Subject KLV-7701-1118 was a 67-year-old woman enrolled at site 0168 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-13 and the first dose of study treatment was administered on 2021-04-06. The baseline performance status was 0 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following pyrexia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-12 and the reason recorded was adverse event.

Subject KLV-7701-1119

Subject KLV-7701-1119 was a 57-year-old woman enrolled at site 0174 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-13 and the first dose of study treatment was administered on 2019-08-22. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: vomiting (grade 4, onset study day 47, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-10-11 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1121

Subject KLV-7701-1121 was a 65-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-17 and the first dose of study treatment was administered on 2020-06-14. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 44, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-26 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1123

Subject KLV-7701-1123 was a 58-year-old woman enrolled at site 0140 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-18 and the first dose of study treatment was administered on 2020-05-05. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 66, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-30 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1124

Subject KLV-7701-1124 was a 68-year-old woman enrolled at site 0161 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-11 and the first dose of study treatment was administered on 2021-09-20. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 105, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 105.

The subject died on 2022-01-03. The event recorded as the cause of death was anaemia, which began on study day 105 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1126

Subject KLV-7701-1126 was a 71-year-old woman enrolled at site 0119 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-31 and the first dose of study treatment was administered on 2021-09-11. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: nausea (grade 3, onset study day 92, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-14 and the reason recorded was protocol deviation.

Subject KLV-7701-1127

Subject KLV-7701-1127 was a 62-year-old woman enrolled at site 0163 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-13 and the first dose of study treatment was administered on 2020-07-07. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 12, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-10-13 and the reason recorded was disease progression.

Subject KLV-7701-1133

Subject KLV-7701-1133 was a 69-year-old woman enrolled at site 0182 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-01-30 and the first dose of study treatment was administered on 2021-02-27. The baseline performance status was 1 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following neutropenia, first reported on study day 7.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-30 and the reason recorded was adverse event.

Subject KLV-7701-1144

Subject KLV-7701-1144 was a 68-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-20 and the first dose of study treatment was administered on 2019-12-15. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 61, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 61.

The subject died on 2020-02-14. The event recorded as the cause of death was thrombocytopenia, which began on study day 61 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1148

Subject KLV-7701-1148 was a 63-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-24 and the first dose of study treatment was administered on 2020-02-01. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-06-23. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1152

Subject KLV-7701-1152 was a 84-year-old woman enrolled at site 0167 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-26 and the first dose of study treatment was administered on 2020-06-03. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: alanine aminotransferase increased (grade 3, onset study day 61, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-09-22 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1154

Subject KLV-7701-1154 was a 60-year-old woman enrolled at site 0179 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-09 and the first dose of study treatment was administered on 2021-05-07. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: urinary tract infection (grade 3, onset study day 73, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2022-02-26. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1156

Subject KLV-7701-1156 was a 67-year-old woman enrolled at site 0179 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-07-07 and the first dose of study treatment was administered on 2019-08-03. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 35, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2021-06-18. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1159

Subject KLV-7701-1159 was a 74-year-old woman enrolled at site 0193 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-01 and the first dose of study treatment was administered on 2019-08-25. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2020-09-30. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1161

Subject KLV-7701-1161 was a 69-year-old woman enrolled at site 0194 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-11 and the first dose of study treatment was administered on 2021-06-02. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject died on 2021-06-19. The event recorded as the cause of death was anaemia, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1162

Subject KLV-7701-1162 was a 55-year-old woman enrolled at site 0158 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-30 and the first dose of study treatment was administered on 2021-09-07. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: hypertension (grade 3, onset study day 103, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-01-03 and the reason recorded was disease progression.

Subject KLV-7701-1165

Subject KLV-7701-1165 was a 68-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-12 and the first dose of study treatment was administered on 2019-09-09. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: nausea (grade 4, onset study day 43, recovered/resolved); thrombocytopenia (grade 3, onset study day 45, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-04-10 and the reason recorded was lost to follow-up.

Subject KLV-7701-1167

Subject KLV-7701-1167 was a 58-year-old woman enrolled at site 0145 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-28 and the first dose of study treatment was administered on 2020-05-12. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: fatigue (grade 4, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-14 and the reason recorded was lost to follow-up.

Subject KLV-7701-1168

Subject KLV-7701-1168 was a 64-year-old woman enrolled at site 0174 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-02 and the first dose of study treatment was administered on 2020-09-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 78, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 78.

The subject died on 2020-12-20. The event recorded as the cause of death was sepsis, which began on study day 78 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1170

Subject KLV-7701-1170 was a 66-year-old woman enrolled at site 0159 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-16 and the first dose of study treatment was administered on 2020-09-26. The baseline performance status was 1 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following abdominal pain, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2020-12-29 and the reason recorded was adverse event.

Subject KLV-7701-1173

Subject KLV-7701-1173 was a 81-year-old woman enrolled at site 0182 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-25 and the first dose of study treatment was administered on 2021-07-23. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2021-08-10. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1174

Subject KLV-7701-1174 was a 67-year-old woman enrolled at site 0123 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-08 and the first dose of study treatment was administered on 2019-08-22. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2020-09-05. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1175

Subject KLV-7701-1175 was a 55-year-old woman enrolled at site 0156 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-28 and the first dose of study treatment was administered on 2021-04-20. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 34, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 34.

The subject died on 2021-05-28. The event recorded as the cause of death was pneumonia, which began on study day 34 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1176

Subject KLV-7701-1176 was a 78-year-old woman enrolled at site 0170 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-12-01 and the first dose of study treatment was administered on 2019-12-23. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The subject died on 2022-03-21. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1180

Subject KLV-7701-1180 was a 70-year-old woman enrolled at site 0154 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-05 and the first dose of study treatment was administered on 2021-08-29. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 5, onset study day 15, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 15.

The subject died on 2021-09-22. The event recorded as the cause of death was myelodysplastic syndrome, which began on study day 15 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1185

Subject KLV-7701-1185 was a 76-year-old woman enrolled at site 0165 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-19 and the first dose of study treatment was administered on 2021-09-26. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 3, onset study day 22, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-08 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1188

Subject KLV-7701-1188 was a 65-year-old woman enrolled at site 0131 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-09 and the first dose of study treatment was administered on 2020-08-30. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The subject died on 2022-03-16. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1197

Subject KLV-7701-1197 was a 58-year-old woman enrolled at site 0123 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-09 and the first dose of study treatment was administered on 2020-05-21. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The subject died on 2021-12-26. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1198

Subject KLV-7701-1198 was a 56-year-old woman enrolled at site 0152 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-26 and the first dose of study treatment was administered on 2021-07-15. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 25, recovered/resolved); sepsis (grade 5, onset study day 61, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 25.

The subject died on 2021-10-03. The event recorded as the cause of death was sepsis, which began on study day 61 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1203

Subject KLV-7701-1203 was a 62-year-old woman enrolled at site 0130 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-01-27 and the first dose of study treatment was administered on 2021-02-24. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 42, recovered/resolved); anaemia (grade 5, onset study day 64, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 64.

The subject died on 2021-05-06. The event recorded as the cause of death was anaemia, which began on study day 64 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1206

Subject KLV-7701-1206 was a 64-year-old woman enrolled at site 0107 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-07-18 and the first dose of study treatment was administered on 2019-08-01. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The subject died on 2021-11-06. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1207

Subject KLV-7701-1207 was a 75-year-old woman enrolled at site 0182 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-18 and the first dose of study treatment was administered on 2020-11-07. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 4, onset study day 51, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 51.

The subject was alive at the last recorded contact. Treatment ended on 2021-04-09 and the reason recorded was adverse event.

Subject KLV-7701-1212

Subject KLV-7701-1212 was a 75-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-06 and the first dose of study treatment was administered on 2021-05-03. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-10-14. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1213

Subject KLV-7701-1213 was a 65-year-old woman enrolled at site 0146 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-21 and the first dose of study treatment was administered on 2020-11-06. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-01-17 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1217

Subject KLV-7701-1217 was a 67-year-old woman enrolled at site 0170 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-16 and the first dose of study treatment was administered on 2019-11-23. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The subject died on 2022-02-25. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1219

Subject KLV-7701-1219 was a 71-year-old woman enrolled at site 0163 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-22 and the first dose of study treatment was administered on 2020-09-16. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: aspartate aminotransferase increased (grade 3, onset study day 26, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-10-01 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1220

Subject KLV-7701-1220 was a 62-year-old woman enrolled at site 0151 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-25 and the first dose of study treatment was administered on 2019-11-10. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-12-01. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1231

Subject KLV-7701-1231 was a 71-year-old woman enrolled at site 0140 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-26 and the first dose of study treatment was administered on 2020-04-19. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The subject died on 2021-12-04. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1232

Subject KLV-7701-1232 was a 50-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-30 and the first dose of study treatment was administered on 2019-11-25. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 95, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-19 and the reason recorded was lost to follow-up.

Subject KLV-7701-1233

Subject KLV-7701-1233 was a 58-year-old woman enrolled at site 0139 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-12-05 and the first dose of study treatment was administered on 2019-12-18. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-05-18. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1241

Subject KLV-7701-1241 was a 75-year-old woman enrolled at site 0156 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-12 and the first dose of study treatment was administered on 2021-05-06. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-27 and the reason recorded was adverse event.

Subject KLV-7701-1242

Subject KLV-7701-1242 was a 65-year-old woman enrolled at site 0189 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-08 and the first dose of study treatment was administered on 2020-04-02. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 18, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 18.

The subject died on 2020-05-02. The event recorded as the cause of death was intestinal obstruction, which began on study day 18 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1244

Subject KLV-7701-1244 was a 64-year-old woman enrolled at site 0190 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-02-03 and the first dose of study treatment was administered on 2021-02-23. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: fatigue (grade 4, onset study day 33, recovered/resolved); anaemia (grade 4, onset study day 61, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 61.

The subject was alive at the last recorded contact. Treatment ended on 2021-04-15 and the reason recorded was adverse event.

Subject KLV-7701-1245

Subject KLV-7701-1245 was a 75-year-old woman enrolled at site 0154 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-29 and the first dose of study treatment was administered on 2020-12-15. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2021-12-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1246

Subject KLV-7701-1246 was a 81-year-old woman enrolled at site 0146 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-28 and the first dose of study treatment was administered on 2020-07-08. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 3, onset study day 21, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-12-19 and the reason recorded was disease progression.

Subject KLV-7701-1251

Subject KLV-7701-1251 was a 62-year-old woman enrolled at site 0156 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-30 and the first dose of study treatment was administered on 2021-10-11. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 40, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 40.

The subject died on 2021-11-22. The event recorded as the cause of death was thrombocytopenia, which began on study day 40 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1252

Subject KLV-7701-1252 was a 65-year-old woman enrolled at site 0136 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-04 and the first dose of study treatment was administered on 2020-05-15. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: dyspnoea (grade 5, onset study day 102, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following dyspnoea, first reported on study day 102.

The subject died on 2020-08-28. The event recorded as the cause of death was dyspnoea, which began on study day 102 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1259

Subject KLV-7701-1259 was a 77-year-old woman enrolled at site 0165 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-09 and the first dose of study treatment was administered on 2020-06-20. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-10-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1264

Subject KLV-7701-1264 was a 60-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-15 and the first dose of study treatment was administered on 2021-10-30. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 28, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 28.

The subject died on 2021-12-10. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 28 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1269

Subject KLV-7701-1269 was a 73-year-old woman enrolled at site 0149 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-11-04 and the first dose of study treatment was administered on 2021-12-02. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: leukopenia (grade 3, onset study day 82, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-02-13 and the reason recorded was physician decision.

Subject KLV-7701-1271

Subject KLV-7701-1271 was a 69-year-old woman enrolled at site 0129 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-20 and the first dose of study treatment was administered on 2020-10-15. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 48, not recovered/not resolved); pneumonia (grade 3, onset study day 116, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-02-03 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1272

Subject KLV-7701-1272 was a 47-year-old woman enrolled at site 0193 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-08-20 and the first dose of study treatment was administered on 2019-09-02. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2021-11-17. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1273

Subject KLV-7701-1273 was a 70-year-old woman enrolled at site 0182 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-08 and the first dose of study treatment was administered on 2020-08-16. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 73, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 73.

The subject died on 2020-11-09. The event recorded as the cause of death was pneumonia, which began on study day 73 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1274

Subject KLV-7701-1274 was a 78-year-old woman enrolled at site 0117 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-07-24 and the first dose of study treatment was administered on 2021-08-08. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 75, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 75.

The subject died on 2021-11-08. The event recorded as the cause of death was thrombocytopenia, which began on study day 75 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1275

Subject KLV-7701-1275 was a 59-year-old woman enrolled at site 0112 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-12 and the first dose of study treatment was administered on 2021-03-19. The baseline performance status was 1 and 4 prior lines of therapy had been received.

Study treatment was withdrawn following anaemia, first reported on study day 110.

The subject was alive at the last recorded contact. Treatment ended on 2021-08-14 and the reason recorded was adverse event.

Subject KLV-7701-1279

Subject KLV-7701-1279 was a 44-year-old woman enrolled at site 0161 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-07-08 and the first dose of study treatment was administered on 2019-08-05. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2020-01-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1280

Subject KLV-7701-1280 was a 62-year-old woman enrolled at site 0159 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-27 and the first dose of study treatment was administered on 2021-01-13. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 16, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-08-03 and the reason recorded was disease progression.

Subject KLV-7701-1284

Subject KLV-7701-1284 was a 66-year-old woman enrolled at site 0113 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-26 and the first dose of study treatment was administered on 2021-05-11. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-12-24 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1285

Subject KLV-7701-1285 was a 55-year-old woman enrolled at site 0151 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-05 and the first dose of study treatment was administered on 2021-09-17. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 86, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 86.

The subject died on 2021-12-15. The event recorded as the cause of death was anaemia, which began on study day 86 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1287

Subject KLV-7701-1287 was a 63-year-old woman enrolled at site 0181 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-05 and the first dose of study treatment was administered on 2020-04-28. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 13, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 13.

The subject died on 2020-05-30. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 13 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1288

Subject KLV-7701-1288 was a 65-year-old woman enrolled at site 0145 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-21 and the first dose of study treatment was administered on 2020-02-07. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject died on 2022-03-27. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1289

Subject KLV-7701-1289 was a 68-year-old woman enrolled at site 0189 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-30 and the first dose of study treatment was administered on 2021-10-16. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 5, onset study day 74, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonitis, first reported on study day 74.

The subject died on 2022-01-04. The event recorded as the cause of death was pneumonitis, which began on study day 74 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1290

Subject KLV-7701-1290 was a 53-year-old woman enrolled at site 0173 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-11 and the first dose of study treatment was administered on 2020-08-31. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2021-11-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1291

Subject KLV-7701-1291 was a 68-year-old woman enrolled at site 0166 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-02 and the first dose of study treatment was administered on 2019-10-30. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: fatigue (grade 3, onset study day 21, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-04-29 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1296

Subject KLV-7701-1296 was a 60-year-old woman enrolled at site 0189 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-12 and the first dose of study treatment was administered on 2020-03-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 27, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-07-05 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1299

Subject KLV-7701-1299 was a 61-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-28 and the first dose of study treatment was administered on 2021-06-22. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 3, onset study day 29, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-10 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1305

Subject KLV-7701-1305 was a 53-year-old woman enrolled at site 0124 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-09 and the first dose of study treatment was administered on 2021-03-17. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 77, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 77.

The subject died on 2021-06-14. The event recorded as the cause of death was thrombocytopenia, which began on study day 77 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1310

Subject KLV-7701-1310 was a 57-year-old woman enrolled at site 0189 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-26 and the first dose of study treatment was administered on 2020-02-19. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 6, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-24 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1314

Subject KLV-7701-1314 was a 64-year-old woman enrolled at site 0162 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-27 and the first dose of study treatment was administered on 2020-02-15. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-05-20. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1316

Subject KLV-7701-1316 was a 74-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-06 and the first dose of study treatment was administered on 2021-09-20. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: diarrhoea (grade 3, onset study day 51, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-07 and the reason recorded was lost to follow-up.

Subject KLV-7701-1318

Subject KLV-7701-1318 was a 77-year-old woman enrolled at site 0193 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-02-15 and the first dose of study treatment was administered on 2020-03-03. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 49, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 49.

The subject died on 2020-04-28. The event recorded as the cause of death was sepsis, which began on study day 49 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1320

Subject KLV-7701-1320 was a 77-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-13 and the first dose of study treatment was administered on 2020-07-02. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 3, onset study day 30, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-01 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1323

Subject KLV-7701-1323 was a 74-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-21 and the first dose of study treatment was administered on 2021-06-29. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 24, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-01-24 and the reason recorded was physician decision.

Subject KLV-7701-1325

Subject KLV-7701-1325 was a 70-year-old woman enrolled at site 0146 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-24 and the first dose of study treatment was administered on 2019-12-14. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2020-11-22. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1326

Subject KLV-7701-1326 was a 66-year-old woman enrolled at site 0187 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-07-24 and the first dose of study treatment was administered on 2021-08-04. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 110, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-23 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1327

Subject KLV-7701-1327 was a 64-year-old woman enrolled at site 0191 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-28 and the first dose of study treatment was administered on 2021-07-14. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 97, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 97.

The subject died on 2021-10-29. The event recorded as the cause of death was pneumonia, which began on study day 97 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1328

Subject KLV-7701-1328 was a 56-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-12-07 and the first dose of study treatment was administered on 2019-12-29. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-08-14. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1329

Subject KLV-7701-1329 was a 74-year-old woman enrolled at site 0120 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-05 and the first dose of study treatment was administered on 2021-04-15. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 32, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-12-17 and the reason recorded was protocol deviation.

Subject KLV-7701-1334

Subject KLV-7701-1334 was a 53-year-old woman enrolled at site 0160 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-14 and the first dose of study treatment was administered on 2020-07-08. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 79, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 79.

The subject died on 2020-10-10. The event recorded as the cause of death was ascites, which began on study day 79 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1336

Subject KLV-7701-1336 was a 75-year-old woman enrolled at site 0127 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-05 and the first dose of study treatment was administered on 2020-12-03. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: lymphopenia (grade 3, onset study day 2, recovered/resolved); anaemia (grade 3, onset study day 21, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following dyspnoea, first reported on study day 82.

The subject died on 2021-10-22. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1337

Subject KLV-7701-1337 was a 68-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-01 and the first dose of study treatment was administered on 2021-04-15. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-12-21. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1338

Subject KLV-7701-1338 was a 52-year-old woman enrolled at site 0125 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-01-29 and the first dose of study treatment was administered on 2020-02-11. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2021-12-02. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1343

Subject KLV-7701-1343 was a 64-year-old woman enrolled at site 0177 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-02-27 and the first dose of study treatment was administered on 2022-03-16. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 25, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 25.

The subject died on 2022-04-18. The event recorded as the cause of death was sepsis, which began on study day 25 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1346

Subject KLV-7701-1346 was a 86-year-old woman enrolled at site 0179 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-12 and the first dose of study treatment was administered on 2020-05-02. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2021-12-26. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1347

Subject KLV-7701-1347 was a 65-year-old woman enrolled at site 0123 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-01-29 and the first dose of study treatment was administered on 2022-02-17. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 74, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 74.

The subject died on 2022-05-02. The event recorded as the cause of death was sepsis, which began on study day 74 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1348

Subject KLV-7701-1348 was a 61-year-old woman enrolled at site 0113 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-30 and the first dose of study treatment was administered on 2020-11-06. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 49, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 49.

The subject died on 2021-01-13. The event recorded as the cause of death was intestinal obstruction, which began on study day 49 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1350

Subject KLV-7701-1350 was a 67-year-old woman enrolled at site 0145 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-02 and the first dose of study treatment was administered on 2021-10-10. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 30, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-01-04 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1352

Subject KLV-7701-1352 was a 72-year-old woman enrolled at site 0127 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-28 and the first dose of study treatment was administered on 2021-01-14. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 58, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 58.

The subject died on 2021-03-26. The event recorded as the cause of death was sepsis, which began on study day 58 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1355

Subject KLV-7701-1355 was a 62-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-18 and the first dose of study treatment was administered on 2019-11-11. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 92, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 92.

The subject died on 2020-02-29. The event recorded as the cause of death was pneumonia, which began on study day 92 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1359

Subject KLV-7701-1359 was a 57-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-14 and the first dose of study treatment was administered on 2019-12-10. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The subject died on 2021-07-04. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1360

Subject KLV-7701-1360 was a 79-year-old woman enrolled at site 0151 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-31 and the first dose of study treatment was administered on 2019-11-15. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-12-09. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1361

Subject KLV-7701-1361 was a 78-year-old woman enrolled at site 0150 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-12 and the first dose of study treatment was administered on 2020-06-05. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 65, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 65.

The subject died on 2020-08-09. The event recorded as the cause of death was pneumonia, which began on study day 65 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1363

Subject KLV-7701-1363 was a 60-year-old woman enrolled at site 0132 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-03 and the first dose of study treatment was administered on 2020-03-14. The baseline performance status was 0 and 3 prior lines of therapy had been received.

Study treatment was withdrawn following decreased appetite, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2020-09-25 and the reason recorded was adverse event.

Subject KLV-7701-1364

Subject KLV-7701-1364 was a 63-year-old woman enrolled at site 0148 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-21 and the first dose of study treatment was administered on 2021-01-01. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pulmonary embolism (grade 5, onset study day 102, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following pulmonary embolism, first reported on study day 102.

The subject died on 2021-04-22. The event recorded as the cause of death was pulmonary embolism, which began on study day 102 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1365

Subject KLV-7701-1365 was a 71-year-old woman enrolled at site 0175 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-20 and the first dose of study treatment was administered on 2021-04-17. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 58, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 58.

The subject died on 2021-07-02. The event recorded as the cause of death was thrombocytopenia, which began on study day 58 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1366

Subject KLV-7701-1366 was a 56-year-old woman enrolled at site 0150 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-28 and the first dose of study treatment was administered on 2020-05-26. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 34, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 34.

The subject died on 2020-07-10. The event recorded as the cause of death was anaemia, which began on study day 34 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1369

Subject KLV-7701-1369 was a 64-year-old woman enrolled at site 0196 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-30 and the first dose of study treatment was administered on 2020-09-13. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-01-28. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1371

Subject KLV-7701-1371 was a 78-year-old woman enrolled at site 0166 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-06 and the first dose of study treatment was administered on 2021-06-22. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 2, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 2.

The subject died on 2021-07-13. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 2 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1372

Subject KLV-7701-1372 was a 66-year-old woman enrolled at site 0180 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-07-18 and the first dose of study treatment was administered on 2021-07-28. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 96, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-29 and the reason recorded was lost to follow-up.

Subject KLV-7701-1373

Subject KLV-7701-1373 was a 56-year-old woman enrolled at site 0183 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-07-22 and the first dose of study treatment was administered on 2019-08-08. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-03-24. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1375

Subject KLV-7701-1375 was a 61-year-old woman enrolled at site 0129 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-06 and the first dose of study treatment was administered on 2020-09-17. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 60, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-02-17 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1377

Subject KLV-7701-1377 was a 76-year-old woman enrolled at site 0105 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-13 and the first dose of study treatment was administered on 2019-12-10. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2020-11-12. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1379

Subject KLV-7701-1379 was a 66-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-11-17 and the first dose of study treatment was administered on 2019-11-26. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 38, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 38.

The subject died on 2020-01-06. The event recorded as the cause of death was pneumonia, which began on study day 38 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1381

Subject KLV-7701-1381 was a 67-year-old woman enrolled at site 0180 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-12 and the first dose of study treatment was administered on 2020-11-08. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2021-09-30. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1384

Subject KLV-7701-1384 was a 85-year-old woman enrolled at site 0188 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-25 and the first dose of study treatment was administered on 2019-10-03. The baseline performance status was 1 and 4 prior lines of therapy had been received.

Study treatment was withdrawn following sepsis, first reported on study day 129.

The subject was alive at the last recorded contact. Treatment ended on 2020-03-07 and the reason recorded was adverse event.

Subject KLV-7701-1392

Subject KLV-7701-1392 was a 65-year-old woman enrolled at site 0187 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-19 and the first dose of study treatment was administered on 2021-05-13. The baseline performance status was 0 and 3 prior lines of therapy had been received.

Study treatment was withdrawn following lymphopenia, first reported on study day 77.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-26 and the reason recorded was adverse event.

Subject KLV-7701-1398

Subject KLV-7701-1398 was a 60-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-03-31 and the first dose of study treatment was administered on 2020-04-27. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 4, onset study day 33, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-08-01 and the reason recorded was physician decision.

Subject KLV-7701-1399

Subject KLV-7701-1399 was a 71-year-old woman enrolled at site 0141 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-02 and the first dose of study treatment was administered on 2021-04-10. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 72, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-12 and the reason recorded was adverse event.

Subject KLV-7701-1411

Subject KLV-7701-1411 was a 73-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-10-22 and the first dose of study treatment was administered on 2019-11-08. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-03-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1413

Subject KLV-7701-1413 was a 62-year-old woman enrolled at site 0193 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-02 and the first dose of study treatment was administered on 2020-08-10. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 20, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2022-01-16. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1416

Subject KLV-7701-1416 was a 84-year-old woman enrolled at site 0166 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2019-09-01 and the first dose of study treatment was administered on 2019-09-19. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2021-03-17. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1421

Subject KLV-7701-1421 was a 73-year-old woman enrolled at site 0194 and assigned to Placebo. Written informed consent was obtained on 2020-01-13 and the first dose of study treatment was administered on 2020-01-27. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 5, onset study day 109, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 109.

The subject died on 2020-05-15. The event recorded as the cause of death was myelodysplastic syndrome, which began on study day 109 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1422

Subject KLV-7701-1422 was a 73-year-old woman enrolled at site 0146 and assigned to Placebo. Written informed consent was obtained on 2020-08-30 and the first dose of study treatment was administered on 2020-09-11. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 23, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 23.

The subject was alive at the last recorded contact. Treatment ended on 2021-02-12 and the reason recorded was adverse event.

Subject KLV-7701-1423

Subject KLV-7701-1423 was a 63-year-old woman enrolled at site 0101 and assigned to Placebo. Written informed consent was obtained on 2021-04-13 and the first dose of study treatment was administered on 2021-04-21. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 3, onset study day 22, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-10 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1424

Subject KLV-7701-1424 was a 67-year-old woman enrolled at site 0165 and assigned to Placebo. Written informed consent was obtained on 2021-01-01 and the first dose of study treatment was administered on 2021-01-12. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 95, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 95.

The subject died on 2021-04-25. The event recorded as the cause of death was sepsis, which began on study day 95 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1425

Subject KLV-7701-1425 was a 66-year-old woman enrolled at site 0152 and assigned to Placebo. Written informed consent was obtained on 2019-08-30 and the first dose of study treatment was administered on 2019-09-14. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: leukopenia (grade 3, onset study day 51, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2021-12-08. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1428

Subject KLV-7701-1428 was a 70-year-old woman enrolled at site 0158 and assigned to Placebo. Written informed consent was obtained on 2021-01-03 and the first dose of study treatment was administered on 2021-01-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-04-11. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1429

Subject KLV-7701-1429 was a 72-year-old woman enrolled at site 0188 and assigned to Placebo. Written informed consent was obtained on 2019-11-15 and the first dose of study treatment was administered on 2019-12-07. The baseline performance status was 2 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 66, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-03 and the reason recorded was disease progression.

Subject KLV-7701-1432

Subject KLV-7701-1432 was a 59-year-old woman enrolled at site 0131 and assigned to Placebo. Written informed consent was obtained on 2019-09-30 and the first dose of study treatment was administered on 2019-10-23. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-05-05. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1434

Subject KLV-7701-1434 was a 69-year-old woman enrolled at site 0107 and assigned to Placebo. Written informed consent was obtained on 2020-01-12 and the first dose of study treatment was administered on 2020-01-28. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 36, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 36.

The subject died on 2020-03-06. The event recorded as the cause of death was neutropenia, which began on study day 36 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1435

Subject KLV-7701-1435 was a 60-year-old woman enrolled at site 0158 and assigned to Placebo. Written informed consent was obtained on 2020-04-06 and the first dose of study treatment was administered on 2020-04-26. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-09-05 and the reason recorded was lost to follow-up.

Subject KLV-7701-1437

Subject KLV-7701-1437 was a 78-year-old woman enrolled at site 0125 and assigned to Placebo. Written informed consent was obtained on 2021-02-23 and the first dose of study treatment was administered on 2021-03-04. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 17, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 17.

The subject died on 2021-04-02. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 17 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1441

Subject KLV-7701-1441 was a 60-year-old woman enrolled at site 0106 and assigned to Placebo. Written informed consent was obtained on 2020-10-10 and the first dose of study treatment was administered on 2020-10-20. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 123, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 123.

The subject died on 2021-02-25. The event recorded as the cause of death was sepsis, which began on study day 123 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1442

Subject KLV-7701-1442 was a 68-year-old woman enrolled at site 0148 and assigned to Placebo. Written informed consent was obtained on 2021-05-03 and the first dose of study treatment was administered on 2021-05-21. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 2, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 2.

The subject died on 2021-06-11. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 2 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1443

Subject KLV-7701-1443 was a 72-year-old woman enrolled at site 0159 and assigned to Placebo. Written informed consent was obtained on 2020-01-26 and the first dose of study treatment was administered on 2020-02-22. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-07-24 and the reason recorded was disease progression.

Subject KLV-7701-1444

Subject KLV-7701-1444 was a 66-year-old woman enrolled at site 0120 and assigned to Placebo. Written informed consent was obtained on 2020-02-08 and the first dose of study treatment was administered on 2020-03-02. The baseline performance status was 1 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following dizziness, first reported on study day 51.

The subject was alive at the last recorded contact. Treatment ended on 2020-10-10 and the reason recorded was adverse event.

Subject KLV-7701-1445

Subject KLV-7701-1445 was a 57-year-old woman enrolled at site 0169 and assigned to Placebo. Written informed consent was obtained on 2020-05-17 and the first dose of study treatment was administered on 2020-06-11. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2021-11-26. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1446

Subject KLV-7701-1446 was a 65-year-old woman enrolled at site 0146 and assigned to Placebo. Written informed consent was obtained on 2019-10-03 and the first dose of study treatment was administered on 2019-10-28. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 4, onset study day 17, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-04-10 and the reason recorded was disease progression.

Subject KLV-7701-1449

Subject KLV-7701-1449 was a 73-year-old woman enrolled at site 0103 and assigned to Placebo. Written informed consent was obtained on 2020-12-29 and the first dose of study treatment was administered on 2021-01-08. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-12-12. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1451

Subject KLV-7701-1451 was a 68-year-old woman enrolled at site 0170 and assigned to Placebo. Written informed consent was obtained on 2021-05-06 and the first dose of study treatment was administered on 2021-05-19. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 21, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-12 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1453

Subject KLV-7701-1453 was a 50-year-old woman enrolled at site 0107 and assigned to Placebo. Written informed consent was obtained on 2021-07-18 and the first dose of study treatment was administered on 2021-07-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-04-01. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1459

Subject KLV-7701-1459 was a 71-year-old woman enrolled at site 0139 and assigned to Placebo. Written informed consent was obtained on 2019-08-06 and the first dose of study treatment was administered on 2019-09-01. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-28 and the reason recorded was disease progression.

Subject KLV-7701-1462

Subject KLV-7701-1462 was a 63-year-old woman enrolled at site 0129 and assigned to Placebo. Written informed consent was obtained on 2020-09-27 and the first dose of study treatment was administered on 2020-10-16. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 31, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 31.

The subject died on 2020-12-02. The event recorded as the cause of death was ascites, which began on study day 31 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1463

Subject KLV-7701-1463 was a 56-year-old woman enrolled at site 0128 and assigned to Placebo. Written informed consent was obtained on 2019-08-28 and the first dose of study treatment was administered on 2019-09-23. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-11-16 and the reason recorded was disease progression.

Subject KLV-7701-1470

Subject KLV-7701-1470 was a 67-year-old woman enrolled at site 0175 and assigned to Placebo. Written informed consent was obtained on 2021-03-13 and the first dose of study treatment was administered on 2021-03-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-10 and the reason recorded was lost to follow-up.

Subject KLV-7701-1473

Subject KLV-7701-1473 was a 62-year-old woman enrolled at site 0164 and assigned to Placebo. Written informed consent was obtained on 2020-10-27 and the first dose of study treatment was administered on 2020-11-23. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 38, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-03-26 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1475

Subject KLV-7701-1475 was a 78-year-old woman enrolled at site 0120 and assigned to Placebo. Written informed consent was obtained on 2020-03-23 and the first dose of study treatment was administered on 2020-04-01. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-05-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1476

Subject KLV-7701-1476 was a 59-year-old woman enrolled at site 0139 and assigned to Placebo. Written informed consent was obtained on 2020-05-17 and the first dose of study treatment was administered on 2020-06-13. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2021-06-25. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1480

Subject KLV-7701-1480 was a 61-year-old woman enrolled at site 0143 and assigned to Placebo. Written informed consent was obtained on 2020-03-04 and the first dose of study treatment was administered on 2020-03-17. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonitis, first reported on study day 2.

The subject died on 2020-03-28. The event recorded as the cause of death was pneumonitis, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1481

Subject KLV-7701-1481 was a 71-year-old woman enrolled at site 0131 and assigned to Placebo. Written informed consent was obtained on 2020-07-31 and the first dose of study treatment was administered on 2020-08-11. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2021-01-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1488

Subject KLV-7701-1488 was a 57-year-old woman enrolled at site 0169 and assigned to Placebo. Written informed consent was obtained on 2020-05-13 and the first dose of study treatment was administered on 2020-06-08. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 63, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-01-09 and the reason recorded was lost to follow-up.

Subject KLV-7701-1492

Subject KLV-7701-1492 was a 76-year-old woman enrolled at site 0114 and assigned to Placebo. Written informed consent was obtained on 2020-07-30 and the first dose of study treatment was administered on 2020-08-06. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 79, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 79.

The subject died on 2020-11-09. The event recorded as the cause of death was sepsis, which began on study day 79 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1497

Subject KLV-7701-1497 was a 60-year-old woman enrolled at site 0147 and assigned to Placebo. Written informed consent was obtained on 2021-11-19 and the first dose of study treatment was administered on 2021-12-14. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 44, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-02-03 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1500

Subject KLV-7701-1500 was a 59-year-old woman enrolled at site 0109 and assigned to Placebo. Written informed consent was obtained on 2021-11-07 and the first dose of study treatment was administered on 2021-11-15. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 3, onset study day 62, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-02-24 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1501

Subject KLV-7701-1501 was a 65-year-old woman enrolled at site 0180 and assigned to Placebo. Written informed consent was obtained on 2019-11-20 and the first dose of study treatment was administered on 2019-12-11. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2021-08-08. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1503

Subject KLV-7701-1503 was a 63-year-old woman enrolled at site 0163 and assigned to Placebo. Written informed consent was obtained on 2020-12-10 and the first dose of study treatment was administered on 2020-12-28. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 2.

The subject died on 2021-01-12. The event recorded as the cause of death was neutropenia, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1504

Subject KLV-7701-1504 was a 76-year-old woman enrolled at site 0182 and assigned to Placebo. Written informed consent was obtained on 2021-06-03 and the first dose of study treatment was administered on 2021-06-26. The baseline performance status was 2 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following constipation, first reported on study day 49.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-01 and the reason recorded was adverse event.

Subject KLV-7701-1510

Subject KLV-7701-1510 was a 76-year-old woman enrolled at site 0161 and assigned to Placebo. Written informed consent was obtained on 2020-12-30 and the first dose of study treatment was administered on 2021-01-20. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-29 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1511

Subject KLV-7701-1511 was a 75-year-old woman enrolled at site 0162 and assigned to Placebo. Written informed consent was obtained on 2021-10-07 and the first dose of study treatment was administered on 2021-11-02. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 91, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 91.

The subject died on 2022-02-09. The event recorded as the cause of death was neutropenia, which began on study day 91 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1512

Subject KLV-7701-1512 was a 71-year-old woman enrolled at site 0152 and assigned to Placebo. Written informed consent was obtained on 2019-11-16 and the first dose of study treatment was administered on 2019-12-06. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: pulmonary embolism (grade 5, onset study day 46, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following pulmonary embolism, first reported on study day 46.

The subject died on 2020-02-04. The event recorded as the cause of death was pulmonary embolism, which began on study day 46 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1514

Subject KLV-7701-1514 was a 61-year-old woman enrolled at site 0188 and assigned to Placebo. Written informed consent was obtained on 2021-07-21 and the first dose of study treatment was administered on 2021-08-17. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-27 and the reason recorded was adverse event.

Subject KLV-7701-1515

Subject KLV-7701-1515 was a 70-year-old woman enrolled at site 0105 and assigned to Placebo. Written informed consent was obtained on 2020-03-02 and the first dose of study treatment was administered on 2020-03-20. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: alanine aminotransferase increased (grade 3, onset study day 9, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-06-18 and the reason recorded was disease progression.

Subject KLV-7701-1516

Subject KLV-7701-1516 was a 52-year-old woman enrolled at site 0156 and assigned to Placebo. Written informed consent was obtained on 2019-10-07 and the first dose of study treatment was administered on 2019-10-21. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 126, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 126.

The subject died on 2020-03-04. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 126 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1517

Subject KLV-7701-1517 was a 47-year-old woman enrolled at site 0139 and assigned to Placebo. Written informed consent was obtained on 2020-03-21 and the first dose of study treatment was administered on 2020-03-31. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 80, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 80.

The subject died on 2020-06-25. The event recorded as the cause of death was intestinal obstruction, which began on study day 80 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1520

Subject KLV-7701-1520 was a 52-year-old woman enrolled at site 0124 and assigned to Placebo. Written informed consent was obtained on 2020-01-08 and the first dose of study treatment was administered on 2020-01-23. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2021-01-07. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1521

Subject KLV-7701-1521 was a 73-year-old woman enrolled at site 0170 and assigned to Placebo. Written informed consent was obtained on 2019-10-10 and the first dose of study treatment was administered on 2019-11-03. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-11-18. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1527

Subject KLV-7701-1527 was a 53-year-old woman enrolled at site 0194 and assigned to Placebo. Written informed consent was obtained on 2020-08-18 and the first dose of study treatment was administered on 2020-09-08. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 5, onset study day 64, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 64.

The subject died on 2020-11-30. The event recorded as the cause of death was myelodysplastic syndrome, which began on study day 64 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1536

Subject KLV-7701-1536 was a 76-year-old woman enrolled at site 0169 and assigned to Placebo. Written informed consent was obtained on 2020-02-02 and the first dose of study treatment was administered on 2020-02-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 2.

The subject died on 2020-03-06. The event recorded as the cause of death was pneumonia, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1537

Subject KLV-7701-1537 was a 54-year-old woman enrolled at site 0109 and assigned to Placebo. Written informed consent was obtained on 2019-10-03 and the first dose of study treatment was administered on 2019-10-10. The baseline performance status was 0 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following leukopenia, first reported on study day 54.

The subject died on 2020-06-03. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1539

Subject KLV-7701-1539 was a 62-year-old woman enrolled at site 0113 and assigned to Placebo. Written informed consent was obtained on 2022-01-14 and the first dose of study treatment was administered on 2022-01-24. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 45, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 45.

The subject was alive at the last recorded contact. Treatment ended on 2022-04-01 and the reason recorded was adverse event.

Subject KLV-7701-1541

Subject KLV-7701-1541 was a 77-year-old woman enrolled at site 0105 and assigned to Placebo. Written informed consent was obtained on 2020-04-25 and the first dose of study treatment was administered on 2020-05-15. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2020-09-13 and the reason recorded was adverse event.

Subject KLV-7701-1542

Subject KLV-7701-1542 was a 62-year-old woman enrolled at site 0170 and assigned to Placebo. Written informed consent was obtained on 2021-10-04 and the first dose of study treatment was administered on 2021-10-16. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 98, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 98.

The subject died on 2022-02-06. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 98 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1543

Subject KLV-7701-1543 was a 65-year-old woman enrolled at site 0170 and assigned to Placebo. Written informed consent was obtained on 2020-05-04 and the first dose of study treatment was administered on 2020-05-30. The baseline performance status was 2 and 4 prior lines of therapy had been received.

The subject died on 2021-10-05. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1545

Subject KLV-7701-1545 was a 68-year-old woman enrolled at site 0192 and assigned to Placebo. Written informed consent was obtained on 2021-11-26 and the first dose of study treatment was administered on 2021-12-05. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 40, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-04 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1546

Subject KLV-7701-1546 was a 65-year-old woman enrolled at site 0104 and assigned to Placebo. Written informed consent was obtained on 2019-07-14 and the first dose of study treatment was administered on 2019-08-10. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 27, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-12-02 and the reason recorded was physician decision.

Subject KLV-7701-1548

Subject KLV-7701-1548 was a 76-year-old woman enrolled at site 0161 and assigned to Placebo. Written informed consent was obtained on 2019-09-27 and the first dose of study treatment was administered on 2019-10-20. The baseline performance status was 1 and 3 prior lines of therapy had been received.

Study treatment was withdrawn following leukopenia, first reported on study day 5.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-12 and the reason recorded was adverse event.

Subject KLV-7701-1553

Subject KLV-7701-1553 was a 61-year-old woman enrolled at site 0143 and assigned to Placebo. Written informed consent was obtained on 2021-10-09 and the first dose of study treatment was administered on 2021-10-29. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 91, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 91.

The subject died on 2022-01-29. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 91 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1555

Subject KLV-7701-1555 was a 66-year-old woman enrolled at site 0134 and assigned to Placebo. Written informed consent was obtained on 2020-11-09 and the first dose of study treatment was administered on 2020-11-20. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: dizziness (grade 3, onset study day 40, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-01-28 and the reason recorded was physician decision.

Subject KLV-7701-1559

Subject KLV-7701-1559 was a 56-year-old woman enrolled at site 0151 and assigned to Placebo. Written informed consent was obtained on 2020-07-04 and the first dose of study treatment was administered on 2020-07-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject died on 2021-06-27. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1560

Subject KLV-7701-1560 was a 81-year-old woman enrolled at site 0157 and assigned to Placebo. Written informed consent was obtained on 2020-09-12 and the first dose of study treatment was administered on 2020-09-22. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-12-22 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1563

Subject KLV-7701-1563 was a 69-year-old woman enrolled at site 0118 and assigned to Placebo. Written informed consent was obtained on 2019-09-16 and the first dose of study treatment was administered on 2019-09-29. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-03-27. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1569

Subject KLV-7701-1569 was a 70-year-old woman enrolled at site 0175 and assigned to Placebo. Written informed consent was obtained on 2021-12-04 and the first dose of study treatment was administered on 2021-12-21. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 32, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 32.

The subject died on 2022-01-22. The event recorded as the cause of death was anaemia, which began on study day 32 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1572

Subject KLV-7701-1572 was a 46-year-old woman enrolled at site 0179 and assigned to Placebo. Written informed consent was obtained on 2021-01-06 and the first dose of study treatment was administered on 2021-01-28. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: nausea (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-06-06 and the reason recorded was disease progression.

Subject KLV-7701-1577

Subject KLV-7701-1577 was a 62-year-old woman enrolled at site 0154 and assigned to Placebo. Written informed consent was obtained on 2020-05-25 and the first dose of study treatment was administered on 2020-06-11. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pleural effusion (grade 5, onset study day 79, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following pleural effusion, first reported on study day 79.

The subject died on 2020-09-06. The event recorded as the cause of death was pleural effusion, which began on study day 79 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1578

Subject KLV-7701-1578 was a 58-year-old woman enrolled at site 0140 and assigned to Placebo. Written informed consent was obtained on 2020-05-11 and the first dose of study treatment was administered on 2020-05-29. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 2, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 2.

The subject died on 2020-06-15. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 2 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1579

Subject KLV-7701-1579 was a 60-year-old woman enrolled at site 0101 and assigned to Placebo. Written informed consent was obtained on 2020-07-06 and the first dose of study treatment was administered on 2020-08-01. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 52, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-01-30 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1581

Subject KLV-7701-1581 was a 74-year-old woman enrolled at site 0150 and assigned to Placebo. Written informed consent was obtained on 2021-06-18 and the first dose of study treatment was administered on 2021-07-07. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 4, onset study day 61, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-28 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1582

Subject KLV-7701-1582 was a 73-year-old woman enrolled at site 0187 and assigned to Placebo. Written informed consent was obtained on 2021-09-05 and the first dose of study treatment was administered on 2021-09-24. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 83, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-22 and the reason recorded was lost to follow-up.

Subject KLV-7701-1584

Subject KLV-7701-1584 was a 74-year-old woman enrolled at site 0167 and assigned to Placebo. Written informed consent was obtained on 2020-11-29 and the first dose of study treatment was administered on 2020-12-12. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 62, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 62.

The subject died on 2021-02-24. The event recorded as the cause of death was anaemia, which began on study day 62 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1586

Subject KLV-7701-1586 was a 79-year-old woman enrolled at site 0114 and assigned to Placebo. Written informed consent was obtained on 2021-06-09 and the first dose of study treatment was administered on 2021-07-02. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The subject died on 2022-04-20. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1590

Subject KLV-7701-1590 was a 80-year-old woman enrolled at site 0106 and assigned to Placebo. Written informed consent was obtained on 2021-08-13 and the first dose of study treatment was administered on 2021-09-06. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonitis, first reported on study day 2.

The subject died on 2021-09-21. The event recorded as the cause of death was pneumonitis, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1593

Subject KLV-7701-1593 was a 74-year-old woman enrolled at site 0187 and assigned to Placebo. Written informed consent was obtained on 2021-09-19 and the first dose of study treatment was administered on 2021-10-03. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-11 and the reason recorded was completion of treatment per protocol.

Subject KLV-7701-1594

Subject KLV-7701-1594 was a 46-year-old woman enrolled at site 0130 and assigned to Placebo. Written informed consent was obtained on 2019-08-11 and the first dose of study treatment was administered on 2019-09-01. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 49, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 49.

The subject died on 2019-11-08. The event recorded as the cause of death was intestinal obstruction, which began on study day 49 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1596

Subject KLV-7701-1596 was a 63-year-old woman enrolled at site 0192 and assigned to Placebo. Written informed consent was obtained on 2021-10-03 and the first dose of study treatment was administered on 2021-10-27. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: fatigue (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-04-08 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1600

Subject KLV-7701-1600 was a 79-year-old woman enrolled at site 0127 and assigned to Placebo. Written informed consent was obtained on 2019-11-11 and the first dose of study treatment was administered on 2019-11-29. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 75, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-02-17 and the reason recorded was protocol deviation.

Subject KLV-7701-1602

Subject KLV-7701-1602 was a 66-year-old woman enrolled at site 0196 and assigned to Placebo. Written informed consent was obtained on 2019-10-04 and the first dose of study treatment was administered on 2019-10-28. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 3, onset study day 2, recovered/resolved); anaemia (grade 3, onset study day 14, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-03-28 and the reason recorded was disease progression.

Subject KLV-7701-1604

Subject KLV-7701-1604 was a 69-year-old woman enrolled at site 0179 and assigned to Placebo. Written informed consent was obtained on 2019-07-23 and the first dose of study treatment was administered on 2019-07-31. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 61, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2019-09-28 and the reason recorded was physician decision.

Subject KLV-7701-1606

Subject KLV-7701-1606 was a 68-year-old woman enrolled at site 0142 and assigned to Placebo. Written informed consent was obtained on 2020-02-19 and the first dose of study treatment was administered on 2020-03-06. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 22, recovered/resolved); neutropenia (grade 3, onset study day 27, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-04-16 and the reason recorded was withdrawal by subject.

Subject KLV-7701-1611

Subject KLV-7701-1611 was a 61-year-old woman enrolled at site 0183 and assigned to Placebo. Written informed consent was obtained on 2019-08-29 and the first dose of study treatment was administered on 2019-09-16. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: decreased appetite (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-01-07 and the reason recorded was disease progression.

Subject KLV-7701-1613

Subject KLV-7701-1613 was a 68-year-old woman enrolled at site 0153 and assigned to Placebo. Written informed consent was obtained on 2019-08-24 and the first dose of study treatment was administered on 2019-09-05. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2020-12-23. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7701-1619

Subject KLV-7701-1619 was a 53-year-old woman enrolled at site 0147 and assigned to Placebo. Written informed consent was obtained on 2021-01-10 and the first dose of study treatment was administered on 2021-01-17. The baseline performance status was 0 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following anaemia, first reported on study day 68.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-24 and the reason recorded was adverse event.

Subject KLV-7701-1621

Subject KLV-7701-1621 was a 48-year-old woman enrolled at site 0162 and assigned to Placebo. Written informed consent was obtained on 2020-06-05 and the first dose of study treatment was administered on 2020-06-25. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 40, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 40.

The subject died on 2020-08-11. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 40 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7701-1623

Subject KLV-7701-1623 was a 80-year-old woman enrolled at site 0150 and assigned to Placebo. Written informed consent was obtained on 2019-10-29 and the first dose of study treatment was administered on 2019-11-22. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The subject died on 2021-06-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7701-1625

Subject KLV-7701-1625 was a 42-year-old woman enrolled at site 0126 and assigned to Placebo. Written informed consent was obtained on 2021-06-05 and the first dose of study treatment was administered on 2021-06-28. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: leukopenia (grade 3, onset study day 41, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-01-06 and the reason recorded was withdrawal by subject.
