Narratives of deaths, other serious adverse events and withdrawals due to adverse events

Subject KLV-7703-1002

Subject KLV-7703-1002 was a 76-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-05 and the first dose of study treatment was administered on 2020-11-13. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-03-30. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1004

Subject KLV-7703-1004 was a 74-year-old woman enrolled at site 0156 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-20 and the first dose of study treatment was administered on 2022-05-03. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 78, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-09-20 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1007

Subject KLV-7703-1007 was a 74-year-old woman enrolled at site 0122 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-08-20 and the first dose of study treatment was administered on 2022-09-09. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 105, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 105.

The subject died on 2022-12-30. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 105 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1008

Subject KLV-7703-1008 was a 66-year-old woman enrolled at site 0149 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-11-06 and the first dose of study treatment was administered on 2021-11-26. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 66, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-12-11 and the reason recorded was physician decision.

Subject KLV-7703-1010

Subject KLV-7703-1010 was a 52-year-old woman enrolled at site 0148 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-23 and the first dose of study treatment was administered on 2021-06-10. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: vomiting (grade 3, onset study day 10, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-15 and the reason recorded was lost to follow-up.

Subject KLV-7703-1016

Subject KLV-7703-1016 was a 68-year-old woman enrolled at site 0124 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-07 and the first dose of study treatment was administered on 2021-05-24. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2022-02-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1017

Subject KLV-7703-1017 was a 50-year-old woman enrolled at site 0119 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-02-22 and the first dose of study treatment was administered on 2022-03-14. The baseline performance status was 1 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following vomiting, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2022-10-06 and the reason recorded was adverse event.

Subject KLV-7703-1028

Subject KLV-7703-1028 was a 67-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-10-28 and the first dose of study treatment was administered on 2020-11-20. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The subject died on 2022-06-18. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1029

Subject KLV-7703-1029 was a 59-year-old woman enrolled at site 0127 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-11-06 and the first dose of study treatment was administered on 2020-12-01. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 35, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-02-21 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1030

Subject KLV-7703-1030 was a 52-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-07-30 and the first dose of study treatment was administered on 2021-08-17. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 124, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 124.

The subject died on 2022-01-08. The event recorded as the cause of death was pneumonia, which began on study day 124 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1031

Subject KLV-7703-1031 was a 79-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-07 and the first dose of study treatment was administered on 2021-12-25. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The subject died on 2022-07-14. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7703-1032

Subject KLV-7703-1032 was a 65-year-old woman enrolled at site 0139 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-11 and the first dose of study treatment was administered on 2021-11-03. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 125, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 125.

The subject died on 2022-03-19. The event recorded as the cause of death was neutropenia, which began on study day 125 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1034

Subject KLV-7703-1034 was a 62-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-03 and the first dose of study treatment was administered on 2020-06-26. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 5, onset study day 66, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonitis, first reported on study day 66.

The subject died on 2020-09-11. The event recorded as the cause of death was pneumonitis, which began on study day 66 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1035

Subject KLV-7703-1035 was a 75-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-04 and the first dose of study treatment was administered on 2021-08-15. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 9, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-31 and the reason recorded was physician decision.

Subject KLV-7703-1042

Subject KLV-7703-1042 was a 79-year-old woman enrolled at site 0145 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-24 and the first dose of study treatment was administered on 2020-08-12. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-09-18. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1043

Subject KLV-7703-1043 was a 57-year-old woman enrolled at site 0142 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-05-04 and the first dose of study treatment was administered on 2022-05-16. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 77, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 77.

The subject died on 2022-08-03. The event recorded as the cause of death was intestinal obstruction, which began on study day 77 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1050

Subject KLV-7703-1050 was a 44-year-old woman enrolled at site 0102 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-07 and the first dose of study treatment was administered on 2021-12-31. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 79, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following urinary tract infection, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2022-07-30 and the reason recorded was adverse event.

Subject KLV-7703-1054

Subject KLV-7703-1054 was a 72-year-old woman enrolled at site 0128 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-08 and the first dose of study treatment was administered on 2020-07-03. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 126, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2022-07-28. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1056

Subject KLV-7703-1056 was a 59-year-old woman enrolled at site 0139 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-03 and the first dose of study treatment was administered on 2020-06-11. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 4, onset study day 29, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-11-16 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1057

Subject KLV-7703-1057 was a 57-year-old woman enrolled at site 0147 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-20 and the first dose of study treatment was administered on 2020-08-11. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-10-11. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1064

Subject KLV-7703-1064 was a 60-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-06-24 and the first dose of study treatment was administered on 2022-07-08. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 57, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-07-15 and the reason recorded was disease progression.

Subject KLV-7703-1065

Subject KLV-7703-1065 was a 73-year-old woman enrolled at site 0158 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-06 and the first dose of study treatment was administered on 2020-12-20. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 51, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2021-07-09. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7703-1067

Subject KLV-7703-1067 was a 71-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-23 and the first dose of study treatment was administered on 2022-01-07. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 79, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-10-13 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1068

Subject KLV-7703-1068 was a 72-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-10 and the first dose of study treatment was administered on 2021-06-29. The baseline performance status was 1 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following anaemia, first reported on study day 3.

The subject was alive at the last recorded contact. Treatment ended on 2021-11-12 and the reason recorded was adverse event.

Subject KLV-7703-1069

Subject KLV-7703-1069 was a 66-year-old woman enrolled at site 0147 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-19 and the first dose of study treatment was administered on 2020-05-17. The baseline performance status was 1 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following aspartate aminotransferase increased, first reported on study day 74.

The subject died on 2022-04-26. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7703-1074

Subject KLV-7703-1074 was a 55-year-old woman enrolled at site 0147 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-26 and the first dose of study treatment was administered on 2021-06-06. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 83, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-23 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1075

Subject KLV-7703-1075 was a 64-year-old woman enrolled at site 0145 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-22 and the first dose of study treatment was administered on 2021-07-12. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: asthenia (grade 3, onset study day 2, recovered/resolved); anaemia (grade 3, onset study day 44, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-30 and the reason recorded was disease progression.

Subject KLV-7703-1076

Subject KLV-7703-1076 was a 74-year-old woman enrolled at site 0147 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-12-04 and the first dose of study treatment was administered on 2021-01-01. The baseline performance status was 0 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following abdominal pain, first reported on study day 71.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-30 and the reason recorded was adverse event.

Subject KLV-7703-1077

Subject KLV-7703-1077 was a 67-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-18 and the first dose of study treatment was administered on 2020-10-11. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 4, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-03-17 and the reason recorded was protocol deviation.

Subject KLV-7703-1078

Subject KLV-7703-1078 was a 74-year-old woman enrolled at site 0159 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-24 and the first dose of study treatment was administered on 2021-11-10. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 27, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 27.

The subject died on 2021-12-13. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 27 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1080

Subject KLV-7703-1080 was a 73-year-old woman enrolled at site 0125 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-23 and the first dose of study treatment was administered on 2021-07-18. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-08-30. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1081

Subject KLV-7703-1081 was a 69-year-old woman enrolled at site 0129 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-08 and the first dose of study treatment was administered on 2021-12-24. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 20, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 20.

The subject was alive at the last recorded contact. Treatment ended on 2022-04-15 and the reason recorded was adverse event.

Subject KLV-7703-1082

Subject KLV-7703-1082 was a 67-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-02-13 and the first dose of study treatment was administered on 2021-03-01. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-10-06. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1083

Subject KLV-7703-1083 was a 66-year-old woman enrolled at site 0123 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-01 and the first dose of study treatment was administered on 2020-07-12. The baseline performance status was 0 and 4 prior lines of therapy had been received.

The subject died on 2021-08-15. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7703-1084

Subject KLV-7703-1084 was a 55-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-01-02 and the first dose of study treatment was administered on 2022-01-29. The baseline performance status was 1 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 99, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-29 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1086

Subject KLV-7703-1086 was a 59-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-07-16 and the first dose of study treatment was administered on 2021-08-02. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2023-01-01. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1088

Subject KLV-7703-1088 was a 80-year-old woman enrolled at site 0150 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-29 and the first dose of study treatment was administered on 2022-05-11. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 68, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-12-11 and the reason recorded was disease progression.

Subject KLV-7703-1090

Subject KLV-7703-1090 was a 64-year-old woman enrolled at site 0129 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-09 and the first dose of study treatment was administered on 2021-04-03. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 69, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2022-12-09. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1096

Subject KLV-7703-1096 was a 78-year-old woman enrolled at site 0133 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-16 and the first dose of study treatment was administered on 2020-10-09. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2021-11-30. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1099

Subject KLV-7703-1099 was a 66-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-14 and the first dose of study treatment was administered on 2020-06-11. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: headache (grade 3, onset study day 93, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-11-17 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1103

Subject KLV-7703-1103 was a 62-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-25 and the first dose of study treatment was administered on 2020-10-14. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-05-03. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1109

Subject KLV-7703-1109 was a 64-year-old woman enrolled at site 0147 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-09 and the first dose of study treatment was administered on 2021-06-04. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: arthralgia (grade 4, onset study day 65, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-02-04 and the reason recorded was physician decision.

Subject KLV-7703-1110

Subject KLV-7703-1110 was a 69-year-old woman enrolled at site 0139 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-05-04 and the first dose of study treatment was administered on 2022-05-19. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 91, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 91.

The subject died on 2022-08-24. The event recorded as the cause of death was sepsis, which began on study day 91 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1116

Subject KLV-7703-1116 was a 56-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-05-08 and the first dose of study treatment was administered on 2021-05-17. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-08-26. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1119

Subject KLV-7703-1119 was a 70-year-old woman enrolled at site 0149 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-12 and the first dose of study treatment was administered on 2021-04-21. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: vomiting (grade 3, onset study day 21, recovered/resolved); anaemia (grade 3, onset study day 28, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-09 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1123

Subject KLV-7703-1123 was a 70-year-old woman enrolled at site 0115 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-11 and the first dose of study treatment was administered on 2022-05-03. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: alanine aminotransferase increased (grade 3, onset study day 39, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-09-20 and the reason recorded was physician decision.

Subject KLV-7703-1131

Subject KLV-7703-1131 was a 61-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-06-29 and the first dose of study treatment was administered on 2021-07-21. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: intestinal obstruction (grade 5, onset study day 84, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following intestinal obstruction, first reported on study day 84.

The subject died on 2021-10-29. The event recorded as the cause of death was intestinal obstruction, which began on study day 84 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1132

Subject KLV-7703-1132 was a 79-year-old woman enrolled at site 0102 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-01-11 and the first dose of study treatment was administered on 2022-01-27. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 22, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-06-25 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1138

Subject KLV-7703-1138 was a 60-year-old woman enrolled at site 0106 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-01-10 and the first dose of study treatment was administered on 2021-01-21. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-12-16. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1145

Subject KLV-7703-1145 was a 49-year-old woman enrolled at site 0132 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-25 and the first dose of study treatment was administered on 2022-01-22. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 20, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-07 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1146

Subject KLV-7703-1146 was a 62-year-old woman enrolled at site 0132 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-10 and the first dose of study treatment was administered on 2022-04-26. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 68, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 68.

The subject died on 2022-07-16. The event recorded as the cause of death was thrombocytopenia, which began on study day 68 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1147

Subject KLV-7703-1147 was a 66-year-old woman enrolled at site 0156 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-28 and the first dose of study treatment was administered on 2020-08-14. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 19, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 19.

The subject died on 2020-09-06. The event recorded as the cause of death was sepsis, which began on study day 19 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1148

Subject KLV-7703-1148 was a 61-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-28 and the first dose of study treatment was administered on 2022-05-25. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 84, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 84.

The subject died on 2022-08-31. The event recorded as the cause of death was pneumonia, which began on study day 84 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1150

Subject KLV-7703-1150 was a 70-year-old woman enrolled at site 0108 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-03-16 and the first dose of study treatment was administered on 2022-03-25. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 5, onset study day 75, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following neutropenia, first reported on study day 75.

The subject died on 2022-06-19. The event recorded as the cause of death was neutropenia, which began on study day 75 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1154

Subject KLV-7703-1154 was a 74-year-old woman enrolled at site 0122 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-06-04 and the first dose of study treatment was administered on 2022-06-27. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 69, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 69.

The subject died on 2022-09-09. The event recorded as the cause of death was sepsis, which began on study day 69 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1159

Subject KLV-7703-1159 was a 71-year-old woman enrolled at site 0139 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-25 and the first dose of study treatment was administered on 2020-10-10. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-08-20. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1160

Subject KLV-7703-1160 was a 71-year-old woman enrolled at site 0116 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2022-04-01 and the first dose of study treatment was administered on 2022-04-28. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 39, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 39.

The subject died on 2022-06-07. The event recorded as the cause of death was anaemia, which began on study day 39 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1165

Subject KLV-7703-1165 was a 64-year-old woman enrolled at site 0155 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-16 and the first dose of study treatment was administered on 2021-04-30. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 132, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-08-25 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1167

Subject KLV-7703-1167 was a 58-year-old woman enrolled at site 0113 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-08 and the first dose of study treatment was administered on 2020-06-17. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 109, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2021-10-17. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1169

Subject KLV-7703-1169 was a 72-year-old woman enrolled at site 0150 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-02 and the first dose of study treatment was administered on 2021-09-29. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pleural effusion (grade 5, onset study day 118, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following pleural effusion, first reported on study day 118.

The subject died on 2022-02-08. The event recorded as the cause of death was pleural effusion, which began on study day 118 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1177

Subject KLV-7703-1177 was a 61-year-old woman enrolled at site 0140 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-04-18 and the first dose of study treatment was administered on 2020-05-09. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2021-05-21. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1179

Subject KLV-7703-1179 was a 76-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-02 and the first dose of study treatment was administered on 2021-10-22. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pulmonary embolism (grade 5, onset study day 15, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following pulmonary embolism, first reported on study day 15.

The subject died on 2021-11-12. The event recorded as the cause of death was pulmonary embolism, which began on study day 15 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1181

Subject KLV-7703-1181 was a 51-year-old woman enrolled at site 0138 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-09 and the first dose of study treatment was administered on 2021-05-03. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: thrombocytopenia (grade 5, onset study day 84, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following thrombocytopenia, first reported on study day 84.

The subject died on 2021-08-07. The event recorded as the cause of death was thrombocytopenia, which began on study day 84 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1183

Subject KLV-7703-1183 was a 47-year-old woman enrolled at site 0126 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-09-28 and the first dose of study treatment was administered on 2020-10-20. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: dyspnoea (grade 5, onset study day 126, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following dyspnoea, first reported on study day 126.

The subject died on 2021-03-09. The event recorded as the cause of death was dyspnoea, which began on study day 126 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1186

Subject KLV-7703-1186 was a 63-year-old woman enrolled at site 0153 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-10 and the first dose of study treatment was administered on 2020-08-02. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2022-12-24. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1187

Subject KLV-7703-1187 was a 77-year-old woman enrolled at site 0140 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-07-16 and the first dose of study treatment was administered on 2020-07-25. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 104, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-10-23 and the reason recorded was disease progression.

Subject KLV-7703-1192

Subject KLV-7703-1192 was a 64-year-old woman enrolled at site 0117 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-02-27 and the first dose of study treatment was administered on 2021-03-17. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 65, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2022-12-25. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1193

Subject KLV-7703-1193 was a 77-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-11-15 and the first dose of study treatment was administered on 2021-11-28. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 18, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 18.

The subject was alive at the last recorded contact. Treatment ended on 2022-05-11 and the reason recorded was adverse event.

Subject KLV-7703-1200

Subject KLV-7703-1200 was a 52-year-old woman enrolled at site 0125 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-28 and the first dose of study treatment was administered on 2021-11-21. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: ascites (grade 5, onset study day 2, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following ascites, first reported on study day 2.

The subject died on 2021-12-12. The event recorded as the cause of death was ascites, which began on study day 2 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1202

Subject KLV-7703-1202 was a 67-year-old woman enrolled at site 0111 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-12-21 and the first dose of study treatment was administered on 2022-01-05. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 53, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-07-27 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1206

Subject KLV-7703-1206 was a 70-year-old woman enrolled at site 0118 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-05-05 and the first dose of study treatment was administered on 2020-05-23. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 48, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject died on 2022-05-08. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1207

Subject KLV-7703-1207 was a 66-year-old woman enrolled at site 0134 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-09-22 and the first dose of study treatment was administered on 2021-10-08. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-21 and the reason recorded was disease progression.

Subject KLV-7703-1208

Subject KLV-7703-1208 was a 54-year-old woman enrolled at site 0137 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-23 and the first dose of study treatment was administered on 2021-11-10. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 71, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 71.

The subject died on 2022-02-04. The event recorded as the cause of death was anaemia, which began on study day 71 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1209

Subject KLV-7703-1209 was a 63-year-old woman enrolled at site 0136 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-01 and the first dose of study treatment was administered on 2020-08-14. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-06-05. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1210

Subject KLV-7703-1210 was a 51-year-old woman enrolled at site 0144 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-08 and the first dose of study treatment was administered on 2021-08-17. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: sepsis (grade 5, onset study day 21, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following sepsis, first reported on study day 21.

The subject died on 2021-09-15. The event recorded as the cause of death was sepsis, which began on study day 21 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1213

Subject KLV-7703-1213 was a 69-year-old woman enrolled at site 0158 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-04-21 and the first dose of study treatment was administered on 2021-05-12. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-09-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1215

Subject KLV-7703-1215 was a 68-year-old woman enrolled at site 0130 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-08-26 and the first dose of study treatment was administered on 2020-09-10. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2022-01-16. The primary cause of death was recorded as other. No adverse event was reported as the cause of death.

Subject KLV-7703-1224

Subject KLV-7703-1224 was a 66-year-old woman enrolled at site 0152 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-11-12 and the first dose of study treatment was administered on 2021-12-03. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 24, not recovered/not resolved); anaemia (grade 3, onset study day 33, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 33.

The subject was alive at the last recorded contact. Treatment ended on 2022-04-29 and the reason recorded was adverse event.

Subject KLV-7703-1228

Subject KLV-7703-1228 was a 55-year-old woman enrolled at site 0128 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-09 and the first dose of study treatment was administered on 2021-03-21. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonitis (grade 3, onset study day 77, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-09-20 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1231

Subject KLV-7703-1231 was a 67-year-old woman enrolled at site 0101 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2020-06-06 and the first dose of study treatment was administered on 2020-06-16. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The subject died on 2022-04-04. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1232

Subject KLV-7703-1232 was a 58-year-old woman enrolled at site 0140 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-08-09 and the first dose of study treatment was administered on 2021-09-03. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-12-08 and the reason recorded was lost to follow-up.

Subject KLV-7703-1233

Subject KLV-7703-1233 was a 59-year-old woman enrolled at site 0151 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-03-07 and the first dose of study treatment was administered on 2021-04-03. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-11-30. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1235

Subject KLV-7703-1235 was a 64-year-old woman enrolled at site 0130 and assigned to Kelvaparib 300 mg. Written informed consent was obtained on 2021-10-22 and the first dose of study treatment was administered on 2021-11-19. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 65, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 65.

The subject died on 2022-02-04. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 65 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1249

Subject KLV-7703-1249 was a 71-year-old woman enrolled at site 0142 and assigned to Placebo. Written informed consent was obtained on 2020-06-17 and the first dose of study treatment was administered on 2020-06-28. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 26, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-07-05 and the reason recorded was protocol deviation.

Subject KLV-7703-1251

Subject KLV-7703-1251 was a 79-year-old woman enrolled at site 0159 and assigned to Placebo. Written informed consent was obtained on 2021-05-11 and the first dose of study treatment was administered on 2021-05-19. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 5, onset study day 61, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following pneumonia, first reported on study day 61.

The subject died on 2021-07-26. The event recorded as the cause of death was pneumonia, which began on study day 61 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1252

Subject KLV-7703-1252 was a 60-year-old woman enrolled at site 0108 and assigned to Placebo. Written informed consent was obtained on 2020-09-18 and the first dose of study treatment was administered on 2020-10-12. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The subject died on 2022-08-16. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1253

Subject KLV-7703-1253 was a 78-year-old woman enrolled at site 0127 and assigned to Placebo. Written informed consent was obtained on 2021-02-26 and the first dose of study treatment was administered on 2021-03-17. The baseline performance status was 1 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following pneumonia, first reported on study day 15.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-26 and the reason recorded was adverse event.

Subject KLV-7703-1258

Subject KLV-7703-1258 was a 84-year-old woman enrolled at site 0110 and assigned to Placebo. Written informed consent was obtained on 2022-01-05 and the first dose of study treatment was administered on 2022-02-02. The baseline performance status was 2 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 5, onset study day 47, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following anaemia, first reported on study day 47.

The subject died on 2022-04-01. The event recorded as the cause of death was anaemia, which began on study day 47 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1261

Subject KLV-7703-1261 was a 54-year-old woman enrolled at site 0143 and assigned to Placebo. Written informed consent was obtained on 2020-11-11 and the first dose of study treatment was administered on 2020-12-04. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2021-04-29. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1262

Subject KLV-7703-1262 was a 74-year-old woman enrolled at site 0114 and assigned to Placebo. Written informed consent was obtained on 2021-10-06 and the first dose of study treatment was administered on 2021-10-15. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The subject died on 2022-07-10. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1263

Subject KLV-7703-1263 was a 69-year-old woman enrolled at site 0139 and assigned to Placebo. Written informed consent was obtained on 2021-11-24 and the first dose of study treatment was administered on 2021-12-07. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: blood creatinine increased (grade 3, onset study day 8, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-07-21 and the reason recorded was disease progression.

Subject KLV-7703-1265

Subject KLV-7703-1265 was a 65-year-old woman enrolled at site 0121 and assigned to Placebo. Written informed consent was obtained on 2020-05-23 and the first dose of study treatment was administered on 2020-06-14. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 5, onset study day 2, fatal). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 2.

The subject died on 2020-06-16. The event recorded as the cause of death was myelodysplastic syndrome, which began on study day 2 and was assessed as related to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1266

Subject KLV-7703-1266 was a 64-year-old woman enrolled at site 0125 and assigned to Placebo. Written informed consent was obtained on 2021-12-27 and the first dose of study treatment was administered on 2022-01-15. The baseline performance status was 0 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following anaemia, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2022-05-19 and the reason recorded was adverse event.

Subject KLV-7703-1267

Subject KLV-7703-1267 was a 49-year-old woman enrolled at site 0138 and assigned to Placebo. Written informed consent was obtained on 2022-07-12 and the first dose of study treatment was administered on 2022-07-31. The baseline performance status was 1 and 3 prior lines of therapy had been received.

Study treatment was withdrawn following vomiting, first reported on study day 24.

The subject was alive at the last recorded contact. Treatment ended on 2022-12-07 and the reason recorded was adverse event.

Subject KLV-7703-1272

Subject KLV-7703-1272 was a 65-year-old woman enrolled at site 0134 and assigned to Placebo. Written informed consent was obtained on 2021-01-16 and the first dose of study treatment was administered on 2021-01-29. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: asthenia (grade 3, onset study day 6, recovered/resolved). Each was assessed by the investigator as related to study treatment.

Study treatment was withdrawn following asthenia, first reported on study day 6.

The subject died on 2021-02-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1274

Subject KLV-7703-1274 was a 74-year-old woman enrolled at site 0127 and assigned to Placebo. Written informed consent was obtained on 2020-12-08 and the first dose of study treatment was administered on 2020-12-21. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-11-09. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1285

Subject KLV-7703-1285 was a 58-year-old woman enrolled at site 0122 and assigned to Placebo. Written informed consent was obtained on 2020-12-25 and the first dose of study treatment was administered on 2021-01-11. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-03-22. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1286

Subject KLV-7703-1286 was a 65-year-old woman enrolled at site 0115 and assigned to Placebo. Written informed consent was obtained on 2020-12-08 and the first dose of study treatment was administered on 2020-12-16. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 69, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2022-04-17. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1292

Subject KLV-7703-1292 was a 66-year-old woman enrolled at site 0104 and assigned to Placebo. Written informed consent was obtained on 2021-11-06 and the first dose of study treatment was administered on 2021-11-24. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 2, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-06-03 and the reason recorded was protocol deviation.

Subject KLV-7703-1293

Subject KLV-7703-1293 was a 69-year-old woman enrolled at site 0109 and assigned to Placebo. Written informed consent was obtained on 2020-07-07 and the first dose of study treatment was administered on 2020-08-03. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The subject died on 2022-01-15. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1295

Subject KLV-7703-1295 was a 58-year-old woman enrolled at site 0120 and assigned to Placebo. Written informed consent was obtained on 2021-08-31 and the first dose of study treatment was administered on 2021-09-11. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 19, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-05-08 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1297

Subject KLV-7703-1297 was a 70-year-old woman enrolled at site 0137 and assigned to Placebo. Written informed consent was obtained on 2022-06-02 and the first dose of study treatment was administered on 2022-06-25. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 53, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 53.

The subject died on 2022-09-03. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 53 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1299

Subject KLV-7703-1299 was a 52-year-old woman enrolled at site 0142 and assigned to Placebo. Written informed consent was obtained on 2020-04-14 and the first dose of study treatment was administered on 2020-04-29. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The subject died on 2022-02-25. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1300

Subject KLV-7703-1300 was a 81-year-old woman enrolled at site 0149 and assigned to Placebo. Written informed consent was obtained on 2021-03-24 and the first dose of study treatment was administered on 2021-04-01. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: abdominal pain (grade 3, onset study day 52, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-15 and the reason recorded was disease progression.

Subject KLV-7703-1301

Subject KLV-7703-1301 was a 68-year-old woman enrolled at site 0103 and assigned to Placebo. Written informed consent was obtained on 2021-02-05 and the first dose of study treatment was administered on 2021-02-25. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 4, onset study day 61, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject died on 2022-11-02. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1302

Subject KLV-7703-1302 was a 67-year-old woman enrolled at site 0107 and assigned to Placebo. Written informed consent was obtained on 2022-07-10 and the first dose of study treatment was administered on 2022-07-17. The baseline performance status was 2 and 2 prior lines of therapy had been received.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2022-11-15 and the reason recorded was adverse event.

Subject KLV-7703-1304

Subject KLV-7703-1304 was a 48-year-old woman enrolled at site 0113 and assigned to Placebo. Written informed consent was obtained on 2021-01-31 and the first dose of study treatment was administered on 2021-02-19. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-12-18. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1310

Subject KLV-7703-1310 was a 66-year-old woman enrolled at site 0121 and assigned to Placebo. Written informed consent was obtained on 2021-02-06 and the first dose of study treatment was administered on 2021-03-02. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 31, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-03-30 and the reason recorded was physician decision.

Subject KLV-7703-1313

Subject KLV-7703-1313 was a 78-year-old woman enrolled at site 0129 and assigned to Placebo. Written informed consent was obtained on 2022-01-01 and the first dose of study treatment was administered on 2022-01-10. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 4, onset study day 90, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-03-10 and the reason recorded was completion of treatment per protocol.

Subject KLV-7703-1314

Subject KLV-7703-1314 was a 71-year-old woman enrolled at site 0112 and assigned to Placebo. Written informed consent was obtained on 2020-11-23 and the first dose of study treatment was administered on 2020-12-03. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The subject died on 2022-02-08. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1316

Subject KLV-7703-1316 was a 70-year-old woman enrolled at site 0151 and assigned to Placebo. Written informed consent was obtained on 2021-04-15 and the first dose of study treatment was administered on 2021-05-05. The baseline performance status was 0 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 88, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following myelodysplastic syndrome, first reported on study day 88.

The subject was alive at the last recorded contact. Treatment ended on 2021-10-01 and the reason recorded was adverse event.

Subject KLV-7703-1317

Subject KLV-7703-1317 was a 78-year-old woman enrolled at site 0139 and assigned to Placebo. Written informed consent was obtained on 2022-08-06 and the first dose of study treatment was administered on 2022-08-21. The baseline performance status was 2 and 4 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 3, onset study day 60, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-11-04 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1323

Subject KLV-7703-1323 was a 56-year-old woman enrolled at site 0117 and assigned to Placebo. Written informed consent was obtained on 2021-08-23 and the first dose of study treatment was administered on 2021-09-15. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 34, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 34.

The subject died on 2021-11-02. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 34 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1325

Subject KLV-7703-1325 was a 71-year-old woman enrolled at site 0132 and assigned to Placebo. Written informed consent was obtained on 2022-07-03 and the first dose of study treatment was administered on 2022-07-19. The baseline performance status was 1 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: aspartate aminotransferase increased (grade 3, onset study day 104, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-12-19 and the reason recorded was disease progression.

Subject KLV-7703-1328

Subject KLV-7703-1328 was a 74-year-old woman enrolled at site 0157 and assigned to Placebo. Written informed consent was obtained on 2021-06-02 and the first dose of study treatment was administered on 2021-06-18. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 4, onset study day 2, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-07-18 and the reason recorded was disease progression.

Subject KLV-7703-1330

Subject KLV-7703-1330 was a 79-year-old woman enrolled at site 0143 and assigned to Placebo. Written informed consent was obtained on 2022-03-07 and the first dose of study treatment was administered on 2022-04-02. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 30, recovered/resolved). Each was assessed by the investigator as related to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-05-19 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1335

Subject KLV-7703-1335 was a 77-year-old woman enrolled at site 0149 and assigned to Placebo. Written informed consent was obtained on 2022-05-17 and the first dose of study treatment was administered on 2022-06-01. The baseline performance status was 2 and 1 prior lines of therapy had been received.

Study treatment was withdrawn following back pain, first reported on study day 2.

The subject was alive at the last recorded contact. Treatment ended on 2022-10-16 and the reason recorded was adverse event.

Subject KLV-7703-1338

Subject KLV-7703-1338 was a 63-year-old woman enrolled at site 0130 and assigned to Placebo. Written informed consent was obtained on 2020-04-26 and the first dose of study treatment was administered on 2020-05-14. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The following serious adverse events were reported: malignant neoplasm progression (grade 5, onset study day 78, fatal). Each was assessed by the investigator as unrelated to study treatment.

Study treatment was withdrawn following malignant neoplasm progression, first reported on study day 78.

The subject died on 2020-08-14. The event recorded as the cause of death was malignant neoplasm progression, which began on study day 78 and was assessed as unrelated to study treatment. The primary cause of death was recorded as adverse event.

Subject KLV-7703-1340

Subject KLV-7703-1340 was a 61-year-old woman enrolled at site 0149 and assigned to Placebo. Written informed consent was obtained on 2021-04-22 and the first dose of study treatment was administered on 2021-05-02. The baseline performance status was 0 and 1 prior lines of therapy had been received.

The subject died on 2022-01-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1345

Subject KLV-7703-1345 was a 58-year-old woman enrolled at site 0145 and assigned to Placebo. Written informed consent was obtained on 2022-02-12 and the first dose of study treatment was administered on 2022-02-21. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: neutropenia (grade 3, onset study day 35, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-07-04 and the reason recorded was withdrawal by subject.

Subject KLV-7703-1346

Subject KLV-7703-1346 was a 46-year-old woman enrolled at site 0146 and assigned to Placebo. Written informed consent was obtained on 2020-11-28 and the first dose of study treatment was administered on 2020-12-09. The baseline performance status was 0 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: anaemia (grade 3, onset study day 92, not recovered/not resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-04-10 and the reason recorded was protocol deviation.

Subject KLV-7703-1347

Subject KLV-7703-1347 was a 68-year-old woman enrolled at site 0109 and assigned to Placebo. Written informed consent was obtained on 2020-06-06 and the first dose of study treatment was administered on 2020-06-29. The baseline performance status was 2 and 3 prior lines of therapy had been received.

The following serious adverse events were reported: myelodysplastic syndrome (grade 4, onset study day 47, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2020-10-11 and the reason recorded was disease progression.

Subject KLV-7703-1349

Subject KLV-7703-1349 was a 56-year-old woman enrolled at site 0146 and assigned to Placebo. Written informed consent was obtained on 2020-11-12 and the first dose of study treatment was administered on 2020-12-08. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2022-09-14. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1352

Subject KLV-7703-1352 was a 77-year-old woman enrolled at site 0127 and assigned to Placebo. Written informed consent was obtained on 2020-06-18 and the first dose of study treatment was administered on 2020-07-02. The baseline performance status was 1 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 3, onset study day 89, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2021-01-16 and the reason recorded was physician decision.

Subject KLV-7703-1353

Subject KLV-7703-1353 was a 65-year-old woman enrolled at site 0131 and assigned to Placebo. Written informed consent was obtained on 2020-06-12 and the first dose of study treatment was administered on 2020-07-09. The baseline performance status was 1 and 1 prior lines of therapy had been received.

The subject died on 2022-02-13. The primary cause of death was recorded as disease progression. No adverse event was reported as the cause of death.

Subject KLV-7703-1354

Subject KLV-7703-1354 was a 50-year-old woman enrolled at site 0157 and assigned to Placebo. Written informed consent was obtained on 2021-11-01 and the first dose of study treatment was administered on 2021-11-11. The baseline performance status was 2 and 2 prior lines of therapy had been received.

The following serious adverse events were reported: pneumonia (grade 3, onset study day 9, recovered/resolved). Each was assessed by the investigator as unrelated to study treatment.

The subject was alive at the last recorded contact. Treatment ended on 2022-01-10 and the reason recorded was physician decision.
